The Global Language of Business

## **HO2C INVOIC introduction V3**

### **Disclaimer:**

The current document provides a way of electronic invoicing which is compliant with the Belgian law.

By implementing it (by mutual consent), the Belgian retailers and their suppliers (electronically) meet the conditions for legal invoicing, and as such "degrade" paper invoices to mere copies of the legal document. However, it must be understood that under no circumstances the current HO2C INVOIC documentation will be regarded as complete unless "credit/debit note" and self billing have fully been incorporated.

## 0. Log of Changes

Version	Release date	Summary of Changes
1.0	July 2014	- Making documentation available
2.0	April 2017	- None
3.0	1 06 2019	<ul style="list-style-type: none"><li>a. Removed the sentences that indicate B10 cannot be mentioned in the invoice. It must be mentioned when conditional allowance is applicable.</li><li>b. Extension calculation rule 4 L: on credit note for damaged goods QTY+124 replaces QTY+47.</li><li>c. Addition calculation rule 7 covering rules K', K, L, and M Those rules existed in former IDEAL INVOIC introduction and in the HO2C INVOIC annex with the overview of all calculation rules, but had been forgotten in the HO2C INVOIC introduction. Those additional chapters also include a clear explanation of bulk goods and the different types of semi-bulk goods.</li></ul>

## 1. Premises

### 1.1. About the documentation

The HO2C (Order to Cash) INVOIC documentation describes the harmonized implementation of the EANCOM® 2002 **INVOIC** message for the Belgian retail sector (FMCG) (for suppliers and retailers).

It is a further elaboration of the **EBL001** User Guide, and is intended to harmonize the invoicing practices of the major Belgian Retailers and Brand Manufacturers.

The EBL001 itself is based on EANCOM® 2002, but for some DEs it uses code values which are not part of the EANCOM® 2002 code list.

The EBL001 is compliant with all legal requirements that are necessary to make a document an invoice, and as such it is a perfect basis for an e-Invoice. It should however be noted that the EBL001 is not the only possible way in which these requirements can be met in an EDI exchange.

### 1.2. How to use this documentation?

The HO2C INVOIC documentation consists of the following documents:

1. The “**INVOIC Introduction**” (this document) provides background information on the principles of eInvoicing and which **calculation rules** apply in the invoice. The last page (A3 format) schematically explains the calculation rules.
2. The “**INVOIC MIG**” (Message Implementation Guideline) explains the message rules, and which segment and code(s) to use.

“**Annex - Mapping rules for RD1 - Art.5**” explains the legally required invoice elements. The MIG informatively refers to these rules with “cf. X”.

“**Annex - EBL001 code list**” provides **national** codes for exemptions of VAT (to be used in TAX, DE 5279) as well as for environment related taxes (to be used in ALC, DE 7161). This document is regularly updated by the Belgian Ministry of Finance. Because of their legal nature the two latter documents do not exist in English, but in Dutch and French only.
3. The “**INVOIC examples**” provide for each scenario an INVOIC example.

## 1.3 Terminology

Often, the terminology used in the legislation is understood wrongly by users. This is how it should be interpreted.

The terms in bold are the ones used in the Belgian legislation.

(Dutch: Belasting = Maatstaf van heffing × Tarief)

(French: Taxe = Base d'imposition × Taux)

E.g.	€ 210 =	€ 1000 ×	21%
English	<b>Tax amount</b> (synonym Value Added Tax) (#83 MOA+150)	<b>Taxable amount</b> $\sum (\#87 \text{ MOA.04G})$ <i>minus payment discount</i>	<b>Tax rate</b> (#86 TAX+7+VAT)
Dutch	<b>Belasting</b> (synonym btw-bedrag)	<b>Maatstaf van heffing</b>	(btw-)tarief (of belastingvoet)
French	<b>Taxe</b> (synonym TVA ou montant de taxe )	<b>Base d'imposition</b>	<b>Taux</b>

Furthermore, "exempt from VAT" means "vrijstelling van btw", "exemption de la TVA".

"Reverse Charge" means "btw verlegd", "auto-liquidation".

## 2. Extra information in regards to Belgian legal requirements

For informative purposes, this chapter presents the full set of 7 calculation rules to apply to the "HO2C INVOIC" message, as approved by the GS1 Belgium & Luxembourg "HO2C (FMCG)" Working Group on November 25th 2009, and updated according to what was agreed in the INVOIC harmonisation meetings with the EDI Committee in November 2013 and December 2018.

### **Purpose**

In this chapter a number of subtotals and calculation rules are added to the basic HO2C INVOIC message, in order to get a clear, concise and complete message that allows easy controlling by the invoicee. These additions have spread over 7 "calculation rules", in order to allow easy consultation. They are also schematically explained on the last page (A3 format).

As for the use of the INVOIC in different scenarios (e.g. free goods, indication of charges or allowances), please consult the document "*INVOIC examples*".

### **Background**

The previous versions of the HO2C INVOIC message were limited in their scope, in that they stayed close to the **EBL001**, a format for electronic invoicing containing only the minimal information that must be present for a document to be a legal invoice.

The EBL001 itself was the successor of the BMF100, a format which allowed legal electronic invoicing, provided the VAT Administration granted a company permission to do so. The BMF100 dates back to before 2004, i.e. to the time when electronic invoicing was not yet legally catered for in Belgium.

As the legal requirements for an invoice are imposed by the VAT Administration, it is easy to understand that the information the Administration requests is not sufficient for user companies to allow the easy processing of incoming invoices in their accountancy. E.g. it is difficult to imagine an invoice without a total amount. Yet, this amount is not legally required!

### **Premises**

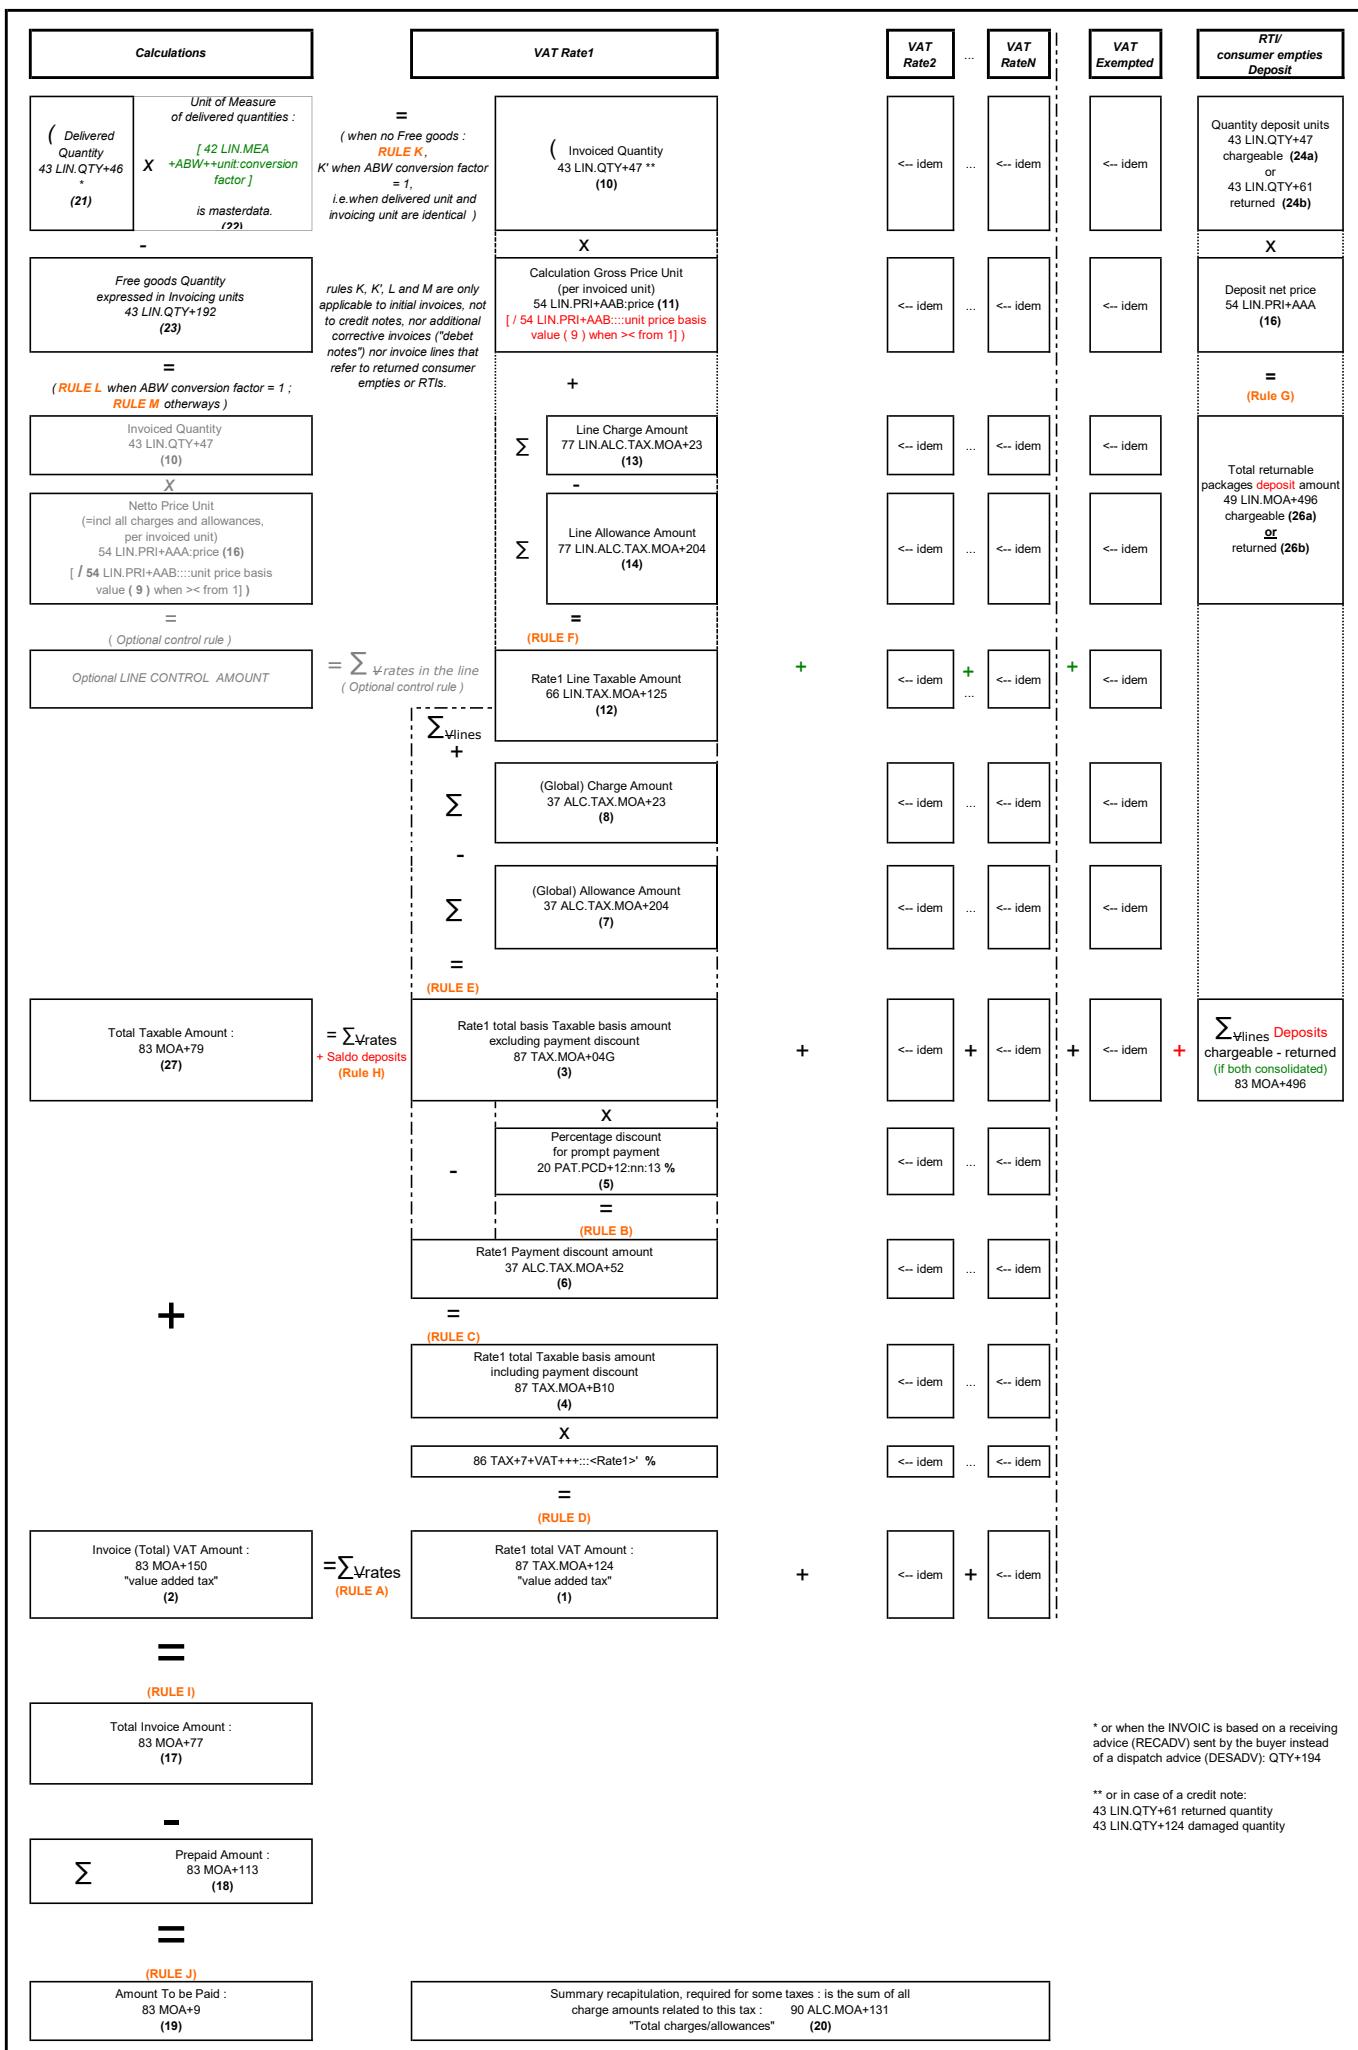

It is important to realize that these calculation rules start from the basic principle of the Belgian VAT Administration, which consists of **applying the VAT calculation as late as possible**, this to avoid the proliferation and expanding of rounding errors.

Furthermore, the information will always be **grouped per applicable VAT rate**.

For practical reasons the calculation rules work backwards from the end of the invoice (= total amounts) up to the different components of the calculations.

The final result is that the invoicee:

- 1.** clearly knows how much he has to pay, and how much VAT is included in this amount;
- 2.** can easily verify these totals with the subtotals and calculation rules which led to that amount.

\* or when the INVOIC is based on a receiving advice (RECADV) sent by the buyer instead of a dispatch advice (DESADV); QTY+192

\*\* or in case of a credit note:  
43 LIN.QTY+61 returned quantity  
43 LIN.QTY+124 damaged quantity

## 2.1. Calculation rule 1:

**The Total VAT Amount of an invoice (#83 MOA+150) is the sum of the total VAT amount computed for each VAT rate.**

### Background:

The Belgian law requires a total VAT amount to be expressed in an invoice, but this amount was missing in the HO2C INVOIC message: the EBL001 only allowed the expression of the total VAT amount *for a given VAT rate* using code value '**124**' (= Tax amount) in **DE 5025** of the MOA segment (#87).

### Decision:

In order to express the (mandatory) total VAT amount of an invoice, it was decided to add:

1. the requirement of an occurrence of the MOA segment #**83** with qualifier '**150**' (= Value added tax) for **DE 5025**.
2. the following **calculation rule** in the Segment notes of this MOA segment (#83): "The amount expressed in DE 5004 with DE 5025 having value '150' is the **total VAT amount** pertaining to this invoice."

This amount is the sum of the VAT amounts that can be found in DE 5004 of all VAT related MOA segments (#87) using qualifier '124' for DE 5025."

#	INVOIC	Meaning of every segment	Ref.
#83	MOA+ <b>150</b> :<..>'	Value added tax ( <b>total</b> for the invoice)	(2)
#87	MOA+ <b>124</b> :<..>'	Value added tax (for <b>each VAT rate</b> )	(1)

The calculation rule may be expressed as follows:

$(2) = \sum_{\text{rates}} (1)_{\text{rate}}$ $\#83 \text{ MOA+150} = \sum_{\text{rates}} (\#87 \text{ MOA+124})_{\text{rate}}$	<b>RULE A</b>
---	---------------

and is mandatory.

$(1)_{\text{rate}}$  will be calculated in "Calculation rule" 2.

## 2.2. Calculation rule 2:

**The VAT Amount per VAT rate (#87 MOA+124)<sub>rate</sub> is computed by applying the given VAT rate to the total Taxable amount for this rate (#87 MOA+04G)<sub>rate</sub> after it has been decreased by the conditional allowance (#37 MOA+52)<sub>rate</sub> (synonym payment discount).**

### **Background :**

- the EBL001 does not indicate how to express the **total basis** amount per VAT rate. Nevertheless, this seems an important subtotal for the verification of the VAT computing.
- (Following BMF 100 rules g, h and i), the **basis taxable amount per VAT rate** is decreased by the conditional allowance. **Regardless of whether the conditions offered by the invoicing party have actually been met, the VAT must be calculated as if this is the case!** As a consequence, a conditional allowance will **always** have an impact on the VAT amount to be paid by the invoicee.

### **Decision :**

Maintain a distinction between

- "the total Taxable amount for a given VAT rate before deducting (excluding) the conditional allowance". (Represented with code 04G – former national code B09).
- and "the total Taxable amount for a given VAT rate after having deducted (taking into account) the conditional allowance". (Represented with national code B10 – *but is not explicitly mentioned in the invoice, except in case the conditional allowance is applicable* )

#	INVOIC	Meaning of every segment	Ref.
#87	MOA+ <b>04G</b> :<..> (replaces former code B09)	Taxable basis amount (per VAT rate) excluding (=before retrieval of) conditional allowance	<b>(3)</b>
#87	MOA+ <b>B10</b> :<..>'	Taxable basis amount (per VAT rate) including (=after retrieval of) conditional allowance	<b>(4)</b>

Since no VAT amount can be calculated before all basis taxable amounts are summed per VAT rate, the **conditional allowance** must be expressed first. (For more details, see "INVOIC examples").

#	INVOIC	Meaning of every segment	Ref.
	...		
#18	PAT+3++5:3:D:30'	Fixed date (payment terms) *: payment due 30 calendar days after reference date (= invoice date)	
#18	PAT+ <b>22</b> '	Discount with prompt pay	
#19	DTM+12:20120624:102'	Allowance terms apply until June 24 <sup>th</sup> (included)	
#20	PCD+12:2:13'	Discount on invoice value is 2%	(5)
#31	ALC+A++++EAB'	Early payment allowance	
#36	TAX+7+VAT+++:< <b>rate1</b> >'	VAT rate being detailed = < <b>rate1</b> >%	
#37	MOA+52:<..>'	Corresponding discount amount <sup>1</sup>	(6)
	...		

\*: Ideally, this information should not be exchanged, as it is master data!

The calculation basis for the 'conditional allowance amount per VAT rate' (#37 MOA+52) is the 'total taxable amount per VAT rate' (#87 MOA+04G).

$(6)_{\text{rate}} = (3)_{\text{rate}} \times (5) [\%]$ $(\#37 \text{ MOA}+52)_{\text{rate}} = (\#87 \text{ MOA}+04G)_{\text{rate}} \times (\text{PCD}+12)$	<b>RULE B</b>
--	---------------

This rule is mandatory for every VAT rate in the invoice if a conditional allowance can be applied. (3)<sub>rate</sub> will be calculated in Calculation rule 3.

Hence, the calculation rule for the taxable basis amount (after retrieval of the conditional allowance) may be expressed as follows:

$(4)_{\text{rate}} = (3)_{\text{rate}} - (6)_{\text{rate}}$ $(\#87 \text{ MOA}+B10)_{\text{rate}} = (\#87 \text{ MOA}+04G)_{\text{rate}} - (\#37 \text{ MOA}+52)_{\text{rate}}$	<b>RULE C</b>
--	---------------

This rule is mandatory for every VAT rate in the invoice.  
(6)<sub>rate</sub> had been calculated above.

<sup>1</sup> Code value "204" (= Allowance amount) could be another possibility instead of "52". However, "52" was withheld in order to avoid any possible confusion with the line item allowances.

Next, the VAT amount per VAT rate can be calculated:

$(1)_{\text{rate}} = (4)_{\text{rate}} \times \text{rate} [\%]$ $(\#87 \text{ MOA}+124)_{\text{rate}} = (\#87 \text{ MOA}+\text{B10})_{\text{rate}} \times \text{rate}$	<b>RULE D</b>
--	---------------

This rule as well is mandatory for every VAT rate in the invoice.

**Note :**

- Code value '**B10**' is a remainder of the BMF100. It was created because EDIFACT / EANCOM® at the time did not offer code values with this exact meaning. In fact, they still do not. In the meantime, former code B09 has been replaced by EANCOM code 04G.
- The user should bear in mind that the calculation of the conditional allowance takes place at Header level, nevertheless needs information from the Summary section, which in the processing of the message chronologically comes after the Heading section.

### 2.3. Calculation rule 3:

The “total basis taxable amount per VAT rate before retrieval of conditional allowance” (#87 MOA+04G)<sub>rate</sub> is obtained by adding all line item amounts subject to this VAT rate, as well as all global (= Header level) Charges and Allowances subject to this same VAT rate.

#### Background :

- the EBL001 does not indicate the total line item amount per VAT rate. Nevertheless, this seems an important subtotal for the verification of the VAT computing.
- (Following BMF 100 rule c), the total basis taxable amount per VAT rate is the sum of the total Line item Amount and the global charges minus the global allowances.

#### Decision :

1. Maintain a rule similar to rule c (p.8) of the BMF100. This results in:

#	INVOIC	Meaning of every segment	Ref.
#31	ALC+C'	[header] Charge	
#36	TAX+7+VAT+++:::<rate1>'	VAT rate being detailed = <rate1>%	
#37	MOA+23:<..>'	[header --- for VAT rate <rate1>%] Global <b>charge</b> amount	(8)
#31	ALC+A'	[header] Allowance	
#36	TAX+7+VAT+++:::<rate1>'	VAT rate being detailed = <rate1>%	
#37	MOA+204:<..>'	[header --- for VAT rate <rate1>%] Global <b>allowance</b> amount]	(7)
#39	LIN+1++<GTIN-1>:SRV'	[LIN] Current line item [invoicing unit] is GTIN <GTIN-1>	
#65	TAX+7+VAT+++:::<rate1>'	VAT rate being detailed = <rate1>%	
#66	MOA+125:<..>'	[LIN] Taxable amount	(12)
#86	TAX+7+VAT+++:::<rate1>'	[Summary] VAT rate being detailed = <rate1>%	

#87	MOA+ <b>04G</b> :<..>'	[Summary] Total basis taxable amount [for the current VAT rate] <u>before</u> retrieval of (=excluding) conditional allowance	<b>(3)</b>
-----	------------------------	--	------------

The calculation can be expressed as follows:

<b>(3)<sub>rate</sub></b> = $\sum_{\text{lines}} (12)_{\text{rate}}$ + $\sum (8)_{\text{rate}}$ - $\sum (7)_{\text{rate}}$	<b>RULE E</b>
<b>(#87 MOA+04G)<sub>rate</sub></b> = $\sum (\#66 \text{ MOA+125})_{\text{rate}}$ + $\sum (\#37 \text{ MOA+23})_{\text{rate}}$ - $\sum (\#37 \text{ MOA+204})_{\text{rate}}$	

This rule is mandatory for every VAT rate in the invoice. Even for amounts exempted of VAT.

## 2.4. Calculation rule 4:

**Each line taxable amount for a given VAT rate (#66 MOA+125)<sub>rate</sub> is obtained by summing the Gross line amount, as well as the line allowances and charges subject to this same VAT rate.**

### **Background :**

- (Following rules a and b from the BMF100), the Line Taxable (or Total) Amount per VAT rate is computed adding all gross Line amounts, all line allowances and all line charges related to this VAT rate.

- the EBL001 uses qualifier '**125**' (= Taxable amount) at line level for **DE 5025** of the MOA segment (#66). This subtotal expresses the line gross amount with the addition of all charges and allowances at line level.

### **Decision :**

#### 1.

Keep qualifier '**125**' (= Taxable amount) for **DE 5025** of the MOA segment (#66), as used in the EBL001:

#	INVOIC	Meaning of every segment	Ref.
#39	LIN+1++<GTIN-1>:SRV'	[LIN] Current line item [invoicing unit] is GTIN <GTIN-1>	
#43	QTY+47:<..>'	[LIN] Invoiced quantity	(10)
#54	PRI+AAA:<..>'	[LIN] Calculation net	
#54	PRI+AAB:<..>'	[LIN] Calculation gross [per invoicing unit]	(11)
#54!	PRI+AAB:price:::<unit price basis value>'	[LIN] Calculation gross [per invoicing unit]	(9)!
#65	TAX+7+VAT+++:::<rate1>'	[LIN] VAT rate being detailed = <rate1>%	
#66	MOA+125:<..>'	[LIN] Taxable amount	(12)
#69	ALC+C+++1+<..>'	[LIN] Charge (of type detailed in <..>)	
#76	TAX+7+VAT+++:::<rate1>'	[LIN] VAT rate being detailed = <rate1>%	
#77	MOA+23:<..>'	[LIN] Charge amount	(13)
#69	ALC+A+++1+<..>'	[LIN] Allowance (of type detailed in <..>)	

#	INVOIC	Meaning of every segment	Ref.
#76	TAX+7+VAT+++:::< <b>rate1</b> >'	[LIN] VAT rate being detailed = < <b>rate1</b> >%	
#77	MOA+204:<..>'	[LIN] <b>Allowance</b> amount	(14)

The **calculation rule** for each line Taxable amount may be expressed as follows:

<b>(12)</b> = [(10) × (11) / <b>(9)</b> ] + $\sum_{\text{within LIN}} (13)$ - $\sum_{\text{within LIN}} (14)$	<b>RULE F</b>
<b>(#66 MOA+125)<sub>rate</sub></b> = [QTY+47 × PRI+AAB] + $\sum_{\text{within LIN}} (\text{MOA+23})$ - $\sum_{\text{within LIN}} (\text{MOA+204})$	

This rule is mandatory for each line item and for every VAT rate in the invoice (even for items exempted of VAT).

When the unit price basis value **(9)** is not present, it is defaulted to the value 1.

The unit price basis value is used when a price is set for a product independently of the trade item (commercial packaging type) of that product.

For instance € 20 for 100 eggs, independently if the eggs are packed by 6, 12 or 30 in a primary packaging (consumer unit) or in a secondary packaging containing 30, 15 or 5 of those primary packagings.

In case secondary packagings containing 30 boxes each containing 6 eggs need to be invoiced, the gross price for 1 unit will be € 20 (for 100 eggs) and the unit price basis value 0,556 (100 eggs : 180 eggs [30 boxes × 6 eggs/box] = 0,556).

## 2.

When the INVOIC message is used as a CREDIT NOTE (a) to credit a certain quantity of returned goods or (b) damaged goods, then in aforementioned proposal the line

#43 QTY+47 : < . . >' [LIN] Invoiced quantity (10)

should read

- (a) #43 QTY+61 : < . . >' [LIN] Return quantity (10)
- (b) #43 QTY+124 : < . . >' [LIN] Damaged goods (10)

## 2.5. Calculation rule 5:

**About net unit price (#54 PRI+AAA) and deposits (#49 MOA+496).**

**Background :**

Both “net unit price” and “deposits” are important elements of an invoice, hence had also been catered for in the EBL001.

**Decision :**

**1.**

Maintain the net unit price definition of the EBL001.

#	INVOIC	Meaning of every segment	Ref.
#54	PRI+AAA:<..>'	Calculation net (the price stated is the net price, including all allowances and charges, and excluding taxes *)	(16)

\*: this data element provides pricing information, so this is the situation before the VAT calculation.

**2.**

From the perspective of the issuer of the invoice, a clear distinction is made between “outgoing RTI and/or consumer empties” (chargeable amount) and “incoming RTIs and/or consumer empties” (deductable amount), each time starting a new LIN occurrence, as it must be possible to refer to an external document governing the flow of RTIs and/or consumer empties.

Please check “INVOIC examples” for an example of invoicing “consumer empties”. Below is an extract for RTI.

#	INVOIC	Meaning of every segment	Ref.
	...		
#39	LIN+1'		
#40	PIA+5+nGRAI-1: <b>SUE</b> '	Asset (type) is identified by nGRAI-1.	
#43	QTY+ <b>47</b> :<..>'	Quantity relevant for invoiced quantity	(24a)
#49	MOA+ <b>496</b> :<..>'	Total returnable packages deposit amount	(26a)
#54	PRI+AAA:<..>'	Net price	(16)
#54	PRI+AAB:<..>'	Gross price	
#39	LIN+2'		

#	INVOIC	Meaning of every segment	Ref.
	...		

Example of the INVOIC used as CREDIT NOTE:

#	INVOIC	Meaning of every segment	Ref.
	...		
#39	LIN+1'		
#40	PIA+5+nGRAI-1: <b>SUE</b> '	Asset (type) is identified by nGRAI-1.	
#43	QTY+ <b>61</b> :<..>'	Quantity relevant for return quantity	(24b)
#49	MOA+ <b>496</b> :<..>'	Total returnable packages deposit amount	(26b)
#54	PRI+AAA:<..>'	Net price	(16)
#54	PRI+AAB:<..>'	Gross price	
#39	LIN+2'		
	...		

The **Total returnable packages deposit amount** for every line item for which deposits apply, can be expressed as follows:

<b>(26a)</b> = (24a) × (16)	[chargeable RTIs/cons.empties]	<b>RULE G</b>
<b>(26b)</b> = (24b) × (16)	[deductable RTIs/cons.empties]	
<b>#49 MOA+496</b> = (#54 PRI+AAA) X (#43 QTY+47) chargeable = idem (#43 QTY+61) deductible		

The necessity of these rules will depend on how business partners consolidate the RTI and consumer empties flows. When used, they are mandatory for every type of RTI and consumer empty.

#### **Notes :**

- It should be noted that the total deposit, i.e. the difference (saldo) between the (26a) and (26b) values for all RTIs and consumer empties, is expressed in the invoice (with #83 MOA+496).

## 2.6. Calculation rule 6:

**The Total Invoice Amount (#83 MOA+77) is the sum of the Total Taxable amounts for each VAT rate, the Total VAT Amount for the invoice and the deposits (if present).**

### Background :

It was decided to not allow previous CNs and “correcting invoices” being consolidated in one invoice message. This makes it possible to conclude the invoice’s processing much quicker, for this won’t depend anymore on pending issues which are not linked to that invoice.

The consolidation of CNs and “correcting invoices” should be catered for with another message like the REMADV (remittance advice). Typically, CNs and “correcting invoices” are not the competence of the Goods Reception or the Buying Dpt. either, but of the Accountancy Dpt.

### Decisions :

#### 1.

The Total Invoice Amount is the sum of all Total Taxable amounts per VAT rate and the Total VAT Amount for the invoice, plus the saldo of the deposits.

#	INVOIC	Meaning of every segment	Ref.
	...		
#83	MOA+79:<..>'	Total line items amount	(27)
#83	MOA+77:<..>'	[Total] Invoice amount	(17)
	...		

This leads to the following mandatory calculation rules:

$(27) = \sum_{\text{rates}} (3)_{\text{rate}} + \sum_{\text{lines}} (26a) - \sum_{\text{lines}} (26b)$ $(\#83 \text{ MOA+79}) = \sum_{\text{rates}} (\#87 \text{ MOA+04G}) + (\#83 \text{ MOA+496})$	<b>RULE H</b>
---	---------------

$(17) = (27) + (2)$ $(\#83 \text{ MOA+77}) = (\#83 \text{ MOA+79}) + (\#83 \text{ MOA+150})$	<b>RULE I</b>
---	---------------

**2.**

**Prepayment** (which is e.g. customary in the wine business) is taken into account after VAT amounts have been calculated, hence can be incorporated in the summary section as follows:

#	INVOIC	Meaning of every segment	Ref.
	...		
#83	MOA+113:<..>'	Prepaid amount	(18)
#84	RFF+PQ:<..>'	Payment reference	
#85	DTM+171:<CCYYMMDD>:102'	Reference date/time	
#83	MOA+9:<..>'	Amount due	(19)
	...		

This gives the following calculation rule:

<b>(19)</b> = (17) - $\Sigma$ (18) <b>(#83 MOA+9)</b> = (#83 MOA+77) - (#83 MOA+113)	<b>RULE J</b>
---	---------------

which is conditional, for it only applies when a prepayment occurred.

## 2.7. Calculation rule 7:

### About the invoiced quantity based on the delivered quantity and the special status of "bulk products", "semi-bulk products" and "Free goods".

The following calculation rules K', K, L and M are conditional and only applicable to initial invoices, consequently not to:

- a. Correcting documents like credit notes or additional invoices ("debit notes").  
Those correcting documents are used in these scenarios:
  - scenarios with only a financial and no logistical transaction. In those cases, the invoice or credit note corrects an error made in a previous invoice:
    - additional invoice that corrects an initial invoice in which certain quantities or prices are too low
    - credit note that corrects an initial invoice in which certain quantities or prices are too high
  - scenario of a credit note for returned or damaged goods (that will not be returned, but will be for instance destroyed)
- b. Not to initial invoices with invoice lines that refer to returned consumer empties or RTIs. For RTI and consumer empties there are separate calculation rules.  
See 5.G.

Calculation rules K', K, L and M include QTY+46. This segment is not available on the abovementioned documents.

## 1. Goods without variable dimensions that can be counted in pieces and have unit price defined per piece

### Background:

These are the basic segments involved in invoicing:

#	INVOIC	Meaning of every segment	Ref.
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..>'	Invoiced quantity expressed in pieces	(10)
#54	PRI+AAB:<..>'	Gross price for 1 piece * (= excluding all allowances, charges, and taxes)	(11)

If there is no unit of measure mentioned within those segments, the default unit of measure "pieces" is used.

\*: per invoiced unit, i.e. without considering free good units! (see 2.7.4)

### Decision:

The ground rules are:

- a. the unit of measure of the invoiced quantity should be the same as that of the unit price
- b. a dispatch unit corresponds with an invoicing unit if it's expressed in the same unit of measure

Only in that case this calculation rule is valid:

(10) = (21)	RULE K'
(#43 QTY+47) = (#43 QTY+46)	

We also consider a "normal" situation, where no exceptional action is required from the customer.

I.e. the dispatched quantity will be equal to the delivered quantity (hence no refused or missing merchandise)!

When the INVOIC is based on a receiving advice (RECADV) sent by the buyer instead of a dispatch advice (DESADV) then in rule K' and all following rules line

#43 QTY+46 : < . . >' [LIN] delivered quantity (21) should read:

#43 QTY+194 : < . . >' [LIN] received and accepted quantity (21)

## 2. Bulk goods

### **Background:**

These are goods which by their nature cannot be expressed in pieces. Consequently, their quantity can only be expressed in physical dimensions (i.e. weight in kilos, volume in litres, length in meters, ...). The price will also be expressed in that same unit of measure.

Moreover, these units of measure (UoM) shouldn't be the subject to any conversion whatsoever. I.e. ordering quantity = delivery quantity = invoicing quantity = physical quantity.

Examples:

- c. truckload of potatoes (= X thousand kilos)
- d. tank of wine (= Y thousand litres).

Bulk goods are always identified with a GTIN-14 starting with indicator 9.

### **Decision:**

No specific attention is needed, because both delivered on the invoiced quantity and the price are expressed in the same unit of measure that refers to physical dimensions and not pieces.

#	INVOIC	Meaning of every segment	Ref.
#43	QTY+46:<..>:<UoM>'	Delivered quantity expressed in physical dimensions	(21)
#43	QTY+47:<..>:<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#54	PRI+AAB:<..>:<UoM>'	gross price per 1 unit of the physical dimension	(11)

So, this doesn't impact any calculation and calculation rule K' will work.

### 3. semi-bulk goods

These are goods of a hybrid nature, having both a bulk and a non-bulk aspect. They can be ordered and delivered in pieces, but are often invoiced in relation to the physical dimensions. Hence, they require specific attention for correct invoicing.

It should be noted that regardless of their variable nature, semi-bulk goods are identified with a GTIN-13: the variances in relation to the average value are part of the product's definition.

3 types of semi-bulk goods occur in practice:

#### Type 1: invoicing based on true measurement

##### Background:

The physical dimensions of the product are not stable and there is a big price increase/decrease when those dimensions are bigger/smaller.

Hence there is a need to both count and measure/weigh the articles, because a "what you pay is what you get" principle applies.

In the invoice, the delivered quantity will be both mentioned in pieces and its physical dimensions. The invoicing unit of measure (kilos, litres, meters, ...) is predefined and ideally part of the master data. Fixing a conversion rate between both is not possible because the product is not stable enough.

Examples:

- salmon ordered & delivered in pieces, but invoiced per kg;
- stewing beef ordered & delivered in trays of approximately 500 gram, but invoiced per kg.

##### Decision:

#	INVOIC	Meaning of every segment	Ref.
#43	QTY+46:<..>:<UoM>'	Delivered quantity expressed in physical dimensions	(21)
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..> :<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#54	PRI+AAB:<..>:<UoM>'	gross price per 1 unit of the physical dimension	(11)

Since (one of the two) the delivered quantity is expressed in the same unit of measure as the invoice (and price) quantity, calculation rule K' will work.

### Type 2: invoicing based on physical average measurement

The physical dimensions of the product are stable, hence the differences between individual units are within pre-defined tolerances and negligible.

At reception, the goods can either be counted or measured/weighed, as the relation between weight and volume has been established and agreed upon by both parties via a fixed conversion factor.

Examples:

- coffee ordered & delivered in packages of 250 g, but invoiced per kg;
- shrimps ordered & delivered in trays of 200 g, but invoiced per kg.

Ideally, this conversion factor is part of the master data.

### Decision

Since in this case the unit of measure of the delivered quantity differs from that of the invoiced quantity and the price, calculation rule K' will not work.

It is necessary to convert the delivered quantity to an invoicing equivalent.

This conversion factor is expressed in the MEA segment (#42):

- DE 6411 mentions the unit of measure of the invoiced quantity (and the price) e.g. KGM;
- DE 6314 mentions the conversion rate. e.g. 0.25

#	INVOIC	Meaning of every segment	Ref.
#42	MEA+ABW++<..>:<UoM>'	Conversion factor to convert the delivered quantity in pieces into the invoiced quantity in physical dimensions	(22)
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..> :<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#54	PRI+AAB:<..>:<UoM>'	gross price per 1 unit of the physical dimension	(11)

The **invoiced quantity = delivered quantity × conversion factor.**

$$(10) = (21) \times (22)$$

$$(\#43 QTY+47) = (\#43 QTY+46) \times (\# 42 MEA+ABW)$$

**RULE K**

In the example of coffee being invoiced per kilo that would lead to the following MEA segment for packages of 250 g as delivered units:

MEA+ABW++<KGM>:<0.25>'

E.g. when 200 packages were delivered, the invoiced quantity will be:

$$200 \times 0,25 = 50 \text{ kg}$$

With boxes of 48 such packages as delivered unit, we would get:

MEA+ABW++<KGM>:<12>'

When 10 boxes were delivered, the invoiced quantity will be:

$$10 \times 12 = 120 \text{ kg}$$

### Type 3: invoicing based on a commercial average measurement

#### **Background:**

The physical dimensions of the product are not stable, but there are commercially agreed fixed dimensions.

There are 2 options in the invoice:

- a. delivered and invoiced quantities and price are all expressed in pieces  
example: crates of tomatoes ordered and invoiced in pieces
- b. delivered quantity is expressed in pieces, invoiced quantity is expressed both in pieces and physical dimensions and the price is related to a unit of the physical dimensions. An additional conversion factor is used to express the invoiced quantity in its physical dimensions.  
example: wheels of cheese ordered in pieces and invoiced as 12 kilogram for each piece.

#### **Decision:**

Type 3.a.

Since the message structure for this kind of semi-bulk goods is identical to "goods without variable dimensions that can be counted in pieces and have unit price defined for a piece", calculation rule K' will work. Delivered and invoiced quantity and price are defined in the same unit of measure.

#	INVOIC	Meaning of every segment	Ref.
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..>'	Invoiced quantity expressed in pieces	(10)
#54	PRI+AAB:<..>'	Gross price for 1 piece (= excluding all allowances, charges, and taxes)	(11)

Type 3.b.

#	INVOIC	Meaning of every segment	Ref.
#42	MEA+ABW++<..>:<UoM>'	Conversion factor to convert the delivered quantity in pieces into the invoiced quantity in physical dimensions	(22)
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..>'	Invoiced quantity expressed in pieces	(21)
#43	QTY+47:<..> :<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#54	PRI+AAB:<..>:<UoM>'	gross price per 1 unit of the physical dimension	(11)

In this case both rules K' and K can be applied.

Rule K' to calculate the invoiced quantity expressed in pieces. And rule K to calculate the invoiced quantity expressed in the physical dimensions.

## 4. Free goods

### Background

Free goods must be mentioned on the invoice. A part of the delivered quantity can be payable and a part can be for free of charge. The sum of both must be equal to the delivered quantity.

The free goods must be expressed in the same unit of measure as the unit price. Hence pieces or physical dimensions depending on the scenario.

### Decisions:

1. For this kind of goods:

- goods without variable dimensions that can be counted in pieces
- bulk goods
- semi-bulk goods type 1 (invoicing based on true measurement)
- semi-bulk goods type 3a (invoicing based on a commercial average measurement),

there will be a unit price, delivered quantity, free goods quantity and invoiced quantity all expressed in the same unit of measure.

#	INVOIC	Meaning of every segment	Ref.
#43	QTY+46:<..>:[UoM]'	Delivered quantity expressed in pieces ( <i>and/or physical dimensions</i> )	(21)
#43	QTY+46:<..>'		
#43	QTY+47:<..>:[UoM]'	Invoiced quantity expressed in pieces ( <i>or physical dimensions</i> )	(10)
#43	QTY+192:<..>:[UoM]'	Free goods quantity expressed in pieces ( <i>or physical dimensions</i> )	(23)
#54	PRI+AAB:<..>:[UoM]'	Gross price for 1 piece ( <i>or 1 unit of the physical dimension</i> ) (= excluding all allowances, charges, and taxes)	(11)

(cursive segments and/or elements are optional depending of the type of goods)

(10) = (21) - (23)  (#43 QTY+47) = (#43 QTY+46) - (#43 QTY+192)	RULE L
---	--------

2. For semi-bulk goods of type 2 (invoicing based on physical average measurement), the delivered quantity is not expressed in the same unit of measure that is used in the unit price, free goods quantity and invoiced quantity. Hence the conversion factor must be applied before making the subtraction between delivered and free goods quantity.

#	INVOIC	Meaning of every segment	Ref.
#42	MEA+ABW++<..>:<UoM>'	Conversion factor to convert the delivered quantity in pieces into the invoiced quantity in physical dimensions	(22)
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+192 :<..> :<UoM>'	Free goods quantity expressed in physical dimensions dimensions]	(23)
#43	QTY+47:<..> :<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#54	PRI+AAB:<..>:<UoM>'	Gross price per 1 unit of the physical dimension	(11)

<b>(10)</b> = [(21) × (22)] - (23)  <b>(#43 QTY+47)</b> = [(#43 QTY+46) x (# 42 MEA+ABW)] - (#43 QTY+192)	<b>RULE M</b>
--	---------------

3. For semi-bulk goods of type 3b (invoicing based on a commercial average measurement) the invoiced quantity is both expressed in pieces as in the physical dimensions. The free goods need to be expressed both in pieces as in the physical dimensions. Hence, both calculation rule L and M need to be applied.

#	<b>INVOIC</b>	<b>Meaning of every segment</b>	<b>Ref.</b>
#42	MEA+ABW++<..>:<UoM>'	Conversion factor to convert the delivered quantity in pieces into the invoiced quantity in physical dimensions	(22)
#43	QTY+46:<..>'	Delivered quantity expressed in pieces	(21)
#43	QTY+47:<..>'	Invoiced quantity expressed in pieces	(21)
#43	QTY+47:<..>:<UoM>'	Invoiced quantity expressed in physical dimensions	(10)
#43	QTY+192:<..>'	Free goods quantity expressed in pieces	(23)
#43	QTY+192:<..>:<UoM>'	Free goods quantity expressed in physical dimensions.	(23)
#54	PRI+AAB:<..>:<UoM>'	gross price per 1 unit of the physical dimension	(11)

**Note:** In case of '**reverse charge**' (= btw verlegd / auto-liquidation), the issuer of the invoice indicates: "TAX+7+VAT++++AE" (AE meaning 'VAT Reverse Charge', code specifying that the standard VAT rate is levied from the invoicee.)

### 3. Indication of penalty terms

**Note:** If the issuer of the invoice wishes, he/she may indicate the penalty terms (with the corresponding penalty % or amount).

**Note 2:** As for the calculation rules, the penalty amount is indicated **for informative purposes only**. It is not taken up in the calculation of the invoice amount.

**Example:** 2.5% of penalty will be charged to the invoicee (in a separate invoice), if he/she does not pay by August 14<sup>th</sup>.

## 4. Conditional allowance (= payment discount)

(= allowance granted by the issuer of the invoice if the invoicee pays before the indicated due date. Synonym 'payment discount')

**Note:** According to Belgian law it is mandatory to take the conditional allowance **into account** for the calculation of the VAT amount, **even if afterwards the conditions for the allowance are NOT met** (i.e. payment after indicated due date)! If several such conditions for an allowance are specified, the invoicee can apply the most advantageous one!

**Note 2:** For each VAT rate present throughout the entire invoice, the corresponding allowance amount is to be indicated. The calculation basis for the 'allowance amount per VAT rate' (#37 MOA+52) is the 'total taxable amount per VAT rate' (indicated in the invoice's summary section with #87 MOA+04G). In other words; even though the 'allowance amount per VAT rate' is indicated in the invoice's heading section, it can only be calculated after the invoice has been fully worked out in the company's in-house system!

**Example:** 2% allowance if the invoicee pays within 10 days after the invoice date.

## 6. RTI

**(= Returnable Transport Item. Synonym: asset, logistic carrier)**

nGRAIs can be found in the GS1 BENELUX RTI list that can be downloaded over here:  
[https://www.gs1.nl/sites/default/files/so\\_emballagecodes\\_gs1beneluxrtiist.xlsx](https://www.gs1.nl/sites/default/files/so_emballagecodes_gs1beneluxrtiist.xlsx)

### 1. Example 1: Charging non-serialized RTI

The issuer of the invoice charges the 24 physical pallets he delivered.

**Note:** it was decided to keep the invoicing of *non-serialized* RTI only (i.e. the type of asset e.g. "CHEP B1210A, Block Pallet, perimetric 1200x1000"). In case serialized RTI is used for delivery, then the issuer of the invoice is to charge (/convert) them as (/to) non-serialized.

**Note 2:** It makes no difference whether the RTI appears at the start of the detail section (i.e. before the trade items) or at the end (i.e. after all the trade items).

**Note 3:** There is no VAT on RTI. Therefore the #65 LIN.TAX segment is **NOT** mentioned, nor the taxable amount #66 LIN.MOA+125.

#39	...	Mention RTI either at the start or at the end

	<b>UNT+45+116'</b>	

## 2. Example 2: Invoice containing 'returned RTI'

The issuer of the invoice charges the 24 physical pallets he delivered, but also takes into account (/deducts) the 3 physical pallets that have returned.

Do note however that the best practice points out to cover 'returned RTI' via credit note (rather than in the commercial invoice). Negative invoices are not allowed. In case the amount of deductible RTIs is higher than the amount of chargeable RTIs + trade items, the returned RTIs should be processed via a separate credit note.

...

## 7. Consumer empties

(= Packaging items that are brought back by the consumer to the shop in exchange for a refund. E.g. empty bottle and/or crate).

**Note:** The supplier is free to choose how to identify consumer empties. Nevertheless, a **separate GTIN** (rather than using the same GTIN of the original trade item) is by far the **most recommended** solution (for one, to cover the different VAT approach).

Best practice:

- GTIN A for trade item (crate with 24 'full' bottles)
- GTIN X for empty crate (without bottles)
- GTIN Y for crate with 24 empty bottles
- GTIN Z for 1 empty bottle

**Note 2:** There is no VAT on consumer empties. Therefore the TAX segment is **NOT** mentioned, nor the taxable amount (MOA+125).

### 1. Example 1: charging 'consumer empties'

The issuer of the invoice charges the trade items (commercial units) as well as the consumer empties. He/she mentions them in separate article lines because of the different VAT%.

...	
<b>LIN+1++&lt;GTIN A&gt;:SRV'</b>	Trade item (full product)

<b>MOA+04G:500'</b>	Taxable amount excl payment discount for 6%
<b>UNT+45+116'</b>	Total number of segment lines

## 2. Example 2: Invoice containing returned 'consumer empties'

The issuer of the invoice charges the trade items (commercial units) as well as the consumer empties but also takes into account (/deducts) the 30 crates (with empty bottles) that have returned.

Do note however that the best practice points out to cover 'returned consumer empties' via credit note (rather than in the commercial invoice). Negative invoices are not allowed. In case the amount of deductible consumer empties is higher than the amount of chargeable consumer empties + trade items, the returned consumer empties should be processed via a separate credit note.

...

notice that is no TAX-MOA segment group in the foot for the RTIs

## 9. Header and/or line allowances

**Note:** The issuer of the invoice can indicate an allowance on header and/or on line level (also called 'detail section'). He/she can do so by selecting a code from the EBL001 code list (DE 7161) e.g. 005 meaning 'dealer discount' or 008 meaning 'introduction allowance'. The allowance is either mentioned as a % (using #33/#73 PCD) or as a fixed amount (using #34/#74 MOA).

**Note 2:** Allowances specified in the detail section do NOT override or replace allowances specified in the header section, but **complement** them.

**Note 3:** For conditional allowance (synonym 'payment discount'), see topic 4.

### 1. Example 1: The issuer of the invoice applies a dealer discount in % (on header level).

## 10. Header and/or line charges

**Note:** The issuer of the invoice can indicate a charge on header and/or on line level. He/she can do so by mentioning an EANCOM 2002 code (e.g. FC meaning Freight Charge) or by selecting a code from the EBL001 code list (DE 7161) e.g. 013 meaning 'RECUPEL'. The charge is either mentioned as a % (using #33/#73 PCD) or as a fixed amount (using #34/#74 MOA).

**Note 2:** Charges specified in the detail section do NOT override or replace charges specified at header level, but **complement** them.

### 1. Example 1: The issuer charges 'freight charges', represented as an amount (on header level).

### 3. Example 3: The issuer of the invoice is subject to a 'milieubijdrage' charge (former BEBAT).

...	
<b>LIN+1++5422222004503:SRV'</b>	Line item
<b>IMD+F++IN::9: «Battery charger incl 4 AA batteries»**</b>	Item description with an explicit mention of the number of batteries the item contains*.
<b>QTY+46:50'</b>	Delivered quantity is 50 units
<b>QTY+47:50'</b>	Invoiced quantity is 50 units
<b>MOA+203:649.78'</b>	Line item amount is 649.78 EUR
<b>PRI+AAA:12.9956'</b>	Net calculation price is 12.9956 EUR (12,5+(4*0,1239))
<b>PRI+AAB:12.50'</b>	Gross calculation price is 12.50 EUR
<b>TAX+7+VAT+++:::21.00'</b>	Line item is subject to a VAT of 21%
<b>MOA+125:649.78' (= 625 + 24.78)</b>	The taxable amount for the line item
<b>ALC+C++++014:::281'</b>	A charge is applied to the line item. It concerns a 'milieubijdrage'/'cotisation environnementale'.
<b>MOA+23:24.78* (= 0.1239 x 200)</b>	Charge amount**
<b>RTE+2:0.1239:1**</b>	The tariff is 0.1239 EUR per battery.
<b>TAX+7+VAT+++:::21.00'</b>	The charge relates to the article of 21% VAT (Charge) amount upon which VAT will be applied
<b>MOA+23:24.78'</b>	
<b>UNS+S'</b>	Here starts the summary section
<b>MOA+77:786.23'</b>	Total invoice amount
<b>MOA+79: 649.78'</b>	Total line items amount
<b>MOA+150:136.45'</b>	Total VAT amount
<b>TAX+7+VAT+++:::21.00'</b>	Part is subject to a value added tax of 21%
<b>MOA+124:136.45'</b>	The value added tax for 21%
<b>MOA+04G:649.78'</b>	Taxable amount excl paym. discount for 21%
<b>ALC+C'</b>	Summary of all header and line charges
<b>MOA+131:24.78'</b>	Summary of all header and line charges
<b>UNT+30+116'</b>	Total number of segment lines

\*At least mention the legally required 'total BEBAT charge amount' (on article level via LIN.ALC.MOA+23).

\*\*Besides that, it is recommended (but not legally required) to mention 'the number of batteries contained in the trade item' (via LIN.IMD+F++IN::9:<battery charger including 4 AA batteries>) and 'the tariff' (via LIN.ALC.MOA.RTE+2:<0.1239>:1').

Please note that the tariff can be subject to change, therefore check the official website for the latest tariffs ([www.bebat.be](http://www.bebat.be)).

## 11. Excise

Excise is mentioned as a **charge** in the invoice on line level as such:  
 #69 ALC+C++++**001**::281'

## 12. Consignment

There are no specific GS1 recommendations on 'consignment' (i.e. the case when the supplier stays owner of the trade items).

## 13. Display

There are several ways of invoicing displays:

1. empty display with its own GTIN on an invoice line \* and the trade items that are included on separate invoice lines
2. full display with its own GTIN on 1 invoice line:
  - a. if all the trade items included in the display have the same VAT rate, the full display has the same VAT rate as all the trade items
  - b. if the trade items included in the display have different VAT rates, then there are 2 options:
    - i. the display is billed at the highest VAT rate of the component trade items (recommended)
    - ii. the display is billed at different VAT rates (not recommended)

\* In most cases the empty displays will not appear on the invoice. Because most displays are disposable (cardboard) and consequently free of charge, or returnable (RTI dolly) and consequently invoiced at a later stage if not all displays have been returned.

**Example:** 2 full displays containing trade items with different VAT rates

1. component trade items of the display are billed on separate invoice lines

<b>UNT</b> +30+73'	Total number of segment lines

## 14. Free goods

In order to know the 'payable quantity', the 'free goods quantity' needs to be **explicitly** indicated in the invoice (with QTY+192, as it's the case in the ORDERS). This is because, unlike the ORDERS and INVOIC message, the DESADV (despatch advice) only mentions the despatch quantity (incl. free goods quantity) without specifying the number of free goods it contains.

Payable qty (QTY+47) = delivered qty (QTY+46) **minus** free goods (QTY+192).

...	
LIN+1++5422222003101:SRV'	Line item 1
IMD+F++IN::9: Carton 15 DVDs'	Item description
QTY+46:45'	Delivered quantity
QTY+192:5'	Free goods quantity
QTY+47:40'	Invoiced (payable) quantity
MOA+203:800' ( <i>not required, but useful</i> )	Line item amount is 2400 EUR
PRI+AAA:20'	Net calculation price
PRI+AAB:20'	Gross calculation price
TAX+7+VAT+++:21.00'	Line item is subject to a VAT of 21%
MOA+125:800'	The taxable amount for the line item
UNS+S'	Here starts the summary section
MOA+77:968 '	Total invoice amount
MOA+79: 800'	Total line items amount
MOA+150:168'	Total VAT amount
TAX+7+VAT+++:21.00'	Part is subject to a value added tax of 21%
MOA+124:168'	The value added tax for 21%
MOA+04G:800'	Taxable amount excl payment discount for 21%
UNT+30+116'	Total number of segment lines

**Note:** Some companies issue a separate invoice containing only free goods (with a total invoice amount equal to € 0). This is also a valid method for the VAT administration.

**Note 2:** Samples (= free test products) can be mentioned the same way as free goods.

## 15. Invoiced units based on a bulk price (via an unit price base value)

The unit price basis value is used when a price is set for a product independently of the trade item (commercial packaging type) of that product.

E.g. eggs ordered, delivered and invoiced in packages of 30 boxes containing 6 eggs. A bulk price of € 20 has been defined for 100 eggs. Since one package contains 180 eggs ( $30 \times 6$ ), the unit price base value is  $100 / 180 = 0,556$  (recommendation is to use up to 3 decimal digits for the unit price base value).

Hence the line amount =  $50 \times (20 / 0,556) = € 1.798,561151$  (recommendation is to use up to 6 decimal digits in the monetary amount segment on line level)

#39	...	
#41	LIN+1++1234567890123:SRV' IMD+F++IN::9:30 BOXES 6 FREE RANGE EGGS'

#65	TAX+7+VAT+++:::6.00'	VAT
#66	MOA+125:1798.561151'	Taxable amount
	...	

## 16. Goods with a variable/special nature Bulk and semi-bulk goods

### 1. Example 1: bulk goods invoiced in its true physical dimension.

Bulk goods can only be expressed in physical dimensions (i.e. kilos, liters, meters, ...).  
Their ordering volume = delivery volume = invoicing volume.  
E.g. a truckload of potatoes (= X thousand kilos),  
a tank of wine (= Y thousand liters).

#39	...	A product with variable dimensions is identified by a GTIN-14 starting with '9'.
#41	LIN+1++9542222001001:SRV'	Delivered quantity
#43	IMD+F++IN::9:Bulk potatoes'	Free goods quantity
	QTY+46:127:KGM'	Payable quantity
	QTY+192:12:KGM'	Line item amount
	QTY+47:115:KGM'	Net price per kg
#49	MOA+203:1150'	Gross price per kg
#54	PRI+AAA:10::::KGM'	VAT
	PRI+AAB:10::::KGM'	Taxable amount
#65	TAX+7+VAT+++:::6.00'	
#66	MOA+125:1150'	
	...	

### 2. Example 2: semi-bulk invoicing based on true measurement (type 1)

semi-bulk goods ordered & delivered in units, but invoiced in its true physical dimension (weighed).

E.g. Meat/cheese ordered & delivered in units (tray of steaks) and weighed at reception to be invoiced per kg.

Note: Free goods quantity is to be expressed in the same measure unit (units, kilos, liters, meters, ...) as the payable quantity.

#39	...	Delivered quantity in kg
#41	LIN+1++95428012850013:SRV'	In units
#43	IMD+F++IN::9:Tray of steaks'	Free goods quantity
	QTY+46:127: <b>KGM'</b>	Payable quantity
	QTY+46:10'	Line item amount
	QTY+192:12: <b>KGM'</b>	Net price
	QTY+47:115: <b>KGM'</b>	Gross price
#49	MOA+203:1150'	VAT
#54	PRI+AAA:10:::: <b>KGM'</b>	Taxable amount
	PRI+AAB:10:::: <b>KGM'</b>	
#65	TAX+7+VAT+++:::6.00'	
#66	MOA+125:1150'	
	...	

### 3. Example 3: semi-bulk invoicing based on physical average measurement (type 2)

semi-bulk goods<sup>1</sup> ordered & delivered in units, but invoiced in kg via a fixed conversion factor.

E.g. Coffee ordered & delivered in units (packages of 250 g), and multiplied by a conversion factor (0.25) to invoice per kg.

#39	LIN+1++5422222001001:SRV'	
#41	IMD+F++IN::9:Coffee 250g'	
#42	MEA+ABW++ <b>KGM</b> :0.25'	Multiplying factor for delivered qty.
#43	QTY+46:800'	Delivered quantity
	QTY+47:200: <b>KGM</b> ' (= 800 x 0.25)	Payable quantity
#49	MOA+203:400'	Line item amount
#54	PRI+AAA:2::::KGM'	Net price
	PRI+AAB:2::::KGM'	Gross price
#65	TAX+7+VAT+++:::6.00'	VAT
#66	MOA+125:400'	Taxable amount

With boxes of 48 packages (of 250g) as delivery unit, we would get a conversion factor of 12. Suppose 10 boxes were delivered, then the invoiced quantity equals 120 kg (= 10 x 12).

### 4. Example 4: semi-bulk invoicing based on a commercial average measurement (type 3)

semi-bulk goods ordered & delivered in units but invoiced in a commercially agreed 'fixed' dimension (although its true nature is variable).

E.g. Cheese/meat ordered & delivered in units, but invoiced either in units, or in fixed weight (NO weighing) (depending on what was agreed with the retailer).

In units:

#39	LIN+1++5428012850013:SRV'	
#41	IMD+F++IN::9:Gouda Belegen'	
#43	QTY+46:10' (delivered)	
	QTY+47:10' (payable)	
#49	MOA+203:800'	
#54	PRI+AAA:80'	
	PRI+AAB:80'	
#65	TAX+7+VAT+++:::6.00'	
#66	MOA+125:800'	
	...	

In fixed weight:

#39	LIN+1++5428012850013:SRV'	
#41	IMD+F++IN::9:Gouda Belegen'	
#42	MEA+ABW++ <b>KGM</b> :12'	
#43	QTY+46:10'	
	QTY+47:10'	
	QTY+47:120: <b>KGM</b> '	
#49	MOA+203:798'	
#54	PRI+AAA:6.65:::: <b>KGM</b> '	
	PRI+AAB:6.65:::: <b>KGM</b> '	
#65	TAX+7+VAT+++:::6.00'	
#66	MOA+125:798'	
	...	

<sup>1</sup> It should be noted that regardless of their variable nature, semi-bulk goods are identified with a GTIN-13: the variances in relation to the average value are part of the product's definition.

## 17. Home delivery

In case of home delivery an end consumer orders goods on the website of the retailer and indicates that the goods:

- have to be delivered at home (delivery address = invoice address)
- have to be delivered at an alternative address like the house of a relative or at work (delivery address ≠ invoice address)
- will be picked up in one of the stores of the retailer

The retailer sends the order to the supplier who needs to deliver the goods on the indicated location.

### 1. Example 1: delivery at home

<pre> # ... 1 <b>UNH</b>+116+INVOIC:D:01B:UN:EAN011' 2 <b>BGM</b>+380+204587+9' 3 <b>DTM</b>+454:20140603:102' 3 <b>DTM</b>+35:20140530:102' 3 <b>DTM</b>+137:20140603:102' 7 <b>RFF</b>+ON:1202' 8 <b>DTM</b>+171:20140420:102' 7 <b>RFF</b>+AAK:2304' 8 <b>DTM</b>+171:20140530:102'  9 <b>NAD</b>+IV+541111000004::9++INVOICEE NAME+INVOICEE STREET AND NR+CITY++POSTAL CODE+COUNTRY CODE' 11 <b>RFF</b>+VA:BE0111000167' 9 <b>NAD</b>+BY+541111000004::9++BUYER NAME+BUYER STREET AND NR+CITY++POSTAL CODE+COUNTRY CODE' 11 <b>RFF</b>+VA:BE0111000167' 9 <b>NAD</b>+SU+542222200005::9++SUPPLIER NAME+SUPPLIER STREET AND NR+CITY++POSTAL CODE+COUNTRY CODE' 10 <b>FII</b>+RB+BE68539007547034+:::GEBABEBB:2 5:5' 11 <b>RFF</b>+VA:BE0222000237' 9 <b>NAD</b>+DP+00000000000000::9'  9 <b>NAD</b>+UC+00000000000000::9++NAME END CONSUMER+STREET AND NR+CITY++POSTAL CODE+COUNTRY CODE' 16 <b>CUX</b>+2:EUR:4' </pre>	<p>The invoicee is the retailer, not the end consumer. <p>...</p>	

## 18. Credit note (CN)

Some ground rules are to be taken into account for credit notes:

- Always indicate it concerns a CN (with BGM+**381**).
- Always refer to the invoice it tries to adjust (with RFF+**IV**). In case one cannot refer to the corresponding invoice, mention RFF+IV:NA' (NA meaning 'not available').
- Always assign a **new** document number to the correcting document.
- Do **NOT** use minus (-) signs.  
Due to the presence of BGM+381 (meaning 'credit note'), every quantity and amount (e.g. *invoiced qty QTY+47, returned qty QTY+61, line taxable amount MOA+125, total returnable packages deposit amount MOA+496 and total invoice amount MOA+77*) is to be considered as **deductable** (in regards to the corresponding invoice).
- The INVOIC message is used as a CN in 4 situations (see examples below) and for correcting errors. Limit every CN to one situation only (e.g. returned goods). If several situations coincide, it is recommended to create a distinct CN per situation.
- Whenever necessary, refer to legal mentions. E.g. For all cases defined by article 79 from the VAT code (= btw-Wetboek), mention KB n° 4, art 4, § 1 3° "BTW terug te storten aan de Staat in de mate waarin ze oorspronkelijk in aftrek werd gebracht").  
# 6 FTX+TXD++Btw terug te storten aan de staat in de mate waarin ze oorspronkelijk in aftrek gebracht werd'
- All elements of the CN should be identical to the ones used when such goods are normally invoiced, except for the indications in **bold** (in the examples below).

### 1. Example 1: Credit returned goods

RETURNS

**Note:** The reason why goods have returned (e.g. because of a change of assortment) is not explicitly mentioned in the CN. Therefore the CN refers to a "returns notice" (with RFF+ALQ), which is a paper transport document that accompanied these goods on their return to the supplier.

#2	BGM+ <b>381</b> +<...>+9'	Credit note
#6	FTX+TXD++Btw terug te storten [...]'	Reference to legal mention
#7 #8	RFF+ <b>ALQ</b> :<...>' DTM+171:<...>:102'	Reference to the (paper) "returns notice" which accompanied the returned goods.
#7 #8	RFF+ <b>IV</b> :<...>' DTM+171:<...>:102'	Reference to the corresponding invoice
#39 #41 #43	... LIN+1++<GTIN1>:SRV' IMD+F++IN::9:<...>' QTY+ <b>61</b> :<...>' ...	Returned GTIN Article description Return quantity

## 2. Example 2: Credit goods that were damaged, without physically returning them.

#2	BGM+ <b>381</b> +<...>+9'	Credit note
#6	FTX+TXD++Btw terug te storten [...]'	Reference to legal mention
#7	RFF+ <b>ACE</b> :<...>' DTM+171:<...>:102'	Reference number of the "claim" (related document) detailing the damaged goods.
#7	RFF+ <b>IV</b> :<...>' DTM+171:<...>:102'	Reference to the corresponding invoice
#39 #41 #43	... LIN+1++<GTIN1>:SRV' IMD+F++IN::9:<...>' QTY+ <b>124</b> :<...>' ...	Returned GTIN Article description Damaged goods qty

This "claim" is not a regular EANCOM® message. How such claims will be notified (paper? electronic message? ...?), and how this information will be detailed, is subject to previous agreements between partners. The CN is the electronic document with which the supplier next processes the "claim".

It is assumed that the damaged goods must not be returned to the supplier. Any exception to this assumption must be detailed in a bilateral agreement, for this return implies costs. Similarly, if the damaged goods are to be destroyed by the customer (e.g. retailer), the bilateral agreement will describe the details of how this should be catered for, as this process also causes extra costs.

## 3. Example 3: Credit returned RTI

#2	BGM+ <b>381</b> +<...>+9'	Credit note
#7	RFF+ <b>ALQ</b> :<...>' DTM+171:<...>:102'	Reference to the (paper) "returns notice" which details the returned RTI.
#7	RFF+ <b>IV</b> :<...>' DTM+171:<...>:102'	Reference to the corresponding invoice
#39 #40 #41 #43 #49 #54 #54	LIN+1' PIA+5+nGRAI-1:SUE' IMD+F++RD::9:<description RTI>::EN' <b>QTY+61:3'</b> <b>MOA+496:60'</b> PRI+AAA:20' PRI+AAB:20' ...	3 pallets have returned Packages deposit amount Net price Gross price

#### 4. Example 4: Credit returned “consumer empties”

#2	BGM+ <b>381+&lt;...&gt;+9'</b>	Credit note
#7 #8	RFF+ <b>ALQ:&lt;...&gt;'</b> DTM+171:<...>:102'	Reference to the (paper) “returns notice” which details the returned consumer empties.
#7 #8	RFF+ <b>IV:&lt;...&gt;'</b> DTM+171:<...>:102'	Reference to the corresponding invoice
#39	LIN+1++GTIN1:SRV'	GTIN (consumer empty)
#41	IMD+F++RD::9:<crate 24 bottles>'	It concerns a consumer empty
#43 #49	<b>QTY+61:3'</b> <b>MOA+496:60'</b>	3 crates have returned Packages deposit amount
#54	PRI+AAA:20' PRI+AAB:20' ...	Net price Gross price

Examples 3 and 4 assume that the supplier is the owner of the RTI (and/or consumer empties) and that his customer returned a quantity of RTI (or consumer empties), accompanied by a “returns notice” (which is assumed to be a paper document, as a physical transport must always be accompanied by such a document). Next the customer will be credited via a CN.

How the balance of outgoing and returned RTI (and consumer empties) is kept, and which time frame is applied to dress up the intermediate RTI (and consumer empties) balance between the partners, is part of the bilateral agreement.

## 19. Correcting errors made in a previous invoice

Ground rules for the CN:

- Always announce it concerns an adjustment (with #5 ALI+++**79E'**).
- The correcting document (CN) must always refer to the erroneous invoice (with RFF+**IV**).
- In order to better focus on the core elements of the CN, the VAT is never mentioned in the following examples, but it should be obvious that VAT **must always** be recalculated in the CN, applying the same rules as in the original INVOIC message.
- Bilaterally agree which correcting **methods** can be used. The VAT administration principally prefers the 1<sup>st</sup> method; i.e. correcting the erroneous invoice by sending an additional document that corrects the error – without cancelling the initial invoice.

However, in case the 1<sup>st</sup> method cannot be applied (e.g. when there are errors in another section than the detail section, or when there are both price and quantity errors in the same line (LIN segment)), then the VAT administration accepts the 2<sup>nd</sup> method; cancelling the initial erroneous invoice, and issue a completely new (correct) invoice.

- 1) Correct simple line item difference(s) (e.g. Price or quantity errors)
- 2) Send credit note (fully cancelling the initial invoice) followed by a new invoice.

## 1. Correct simple line item difference(s) (e.g. Price or quantity errors)

Method:

To correct "over invoiced" errors, send a CN only.

To correct "under invoiced" errors, send an additional invoice.

The newly created message will only contain the line items (LIN segments) that are to be corrected in the INVOIC message it refers to.

When an invoice with allowances and/or charges has to be corrected due to price errors, the best practice is that the allowances and/or charges are NOT included in credit note. In that case, the gross price that will correct the price difference, will be equal to the net price in the credit note. Hence it is recommended **NOT to communicate the ALC-segments for the line items to be corrected in this type of CN.** It is assumed that the previously erroneous information will be communicated correctly at the second attempt, and that it will not add value for the invoiced party to explicitly double check the complete recalculation of the allowances and charges.

However, when an invoice with allowances and/or charges has to be corrected due to quantity errors, there is no other option then to include the allowances and/or charges in the credit note. Otherwise, the invoice and credit note cannot be in balance.

### 1. Example 1: Correct "over invoicing" (quantity)

The supplier sends a **CN** containing ONLY the surplus (credit) for the "over-invoiced" line items (LIN segments).

#2	BGM+ <b>381</b> +<...>+9'	Credit note
#5	ALI+++ <b>79E</b> '	Discrepancies or adjustments.

#66	MOA+125	Taxable amount
	...	

Although "invoiced quantity" (47) is definitely not the appropriate denomination, the combination of this QTY segment (#43) with the BGM segment (#2) unambiguously identifies the detailed quantity as the (excess) quantity erroneously invoiced in the referenced invoice, which is now credited in order to correct this error.

## 2. Example 2: Correct “over invoicing” (price)

#2	BGM+ <b>381</b> +<...>+9'	Credit note
#5	ALI+++ <b>79E</b> '	Discrepancies or adjustments.
#6	FTX+TXD++Btw terug te storten [...]'	Reference to legal mention
#7	RFF+ <b>IV</b> :<...>'	Reference to the corresponding invoice
#8	DTM+171:<...>:102'	
	...	
#39	LIN+1++<GTIN1>:SRV'	
#41	IMD+F++IN::9:<...>'	
#43	QTY+47:<15>'	Invoiced qty
#54	PRI+ <b>AAA</b> :<...>'	Although AAA means ‘net price’; In a CN (indicated with BGM+381), it is to be considered as the <b>difference</b> between the erroneous & the correct unit price.
#54	PRI+ <b>AAB</b> :<...>'	
#66	MOA+125	
	...	

## 3. Example 3: Correct “under invoicing” (price)

Method: **Send additional invoice** correcting “**under invoiced**” goods (e.g. if not enough quantity was charged in the corresponding invoice, or if the price was too low). The invoice contains only the deficit for the “under invoiced” line items (LIN segments).

#2	BGM+ <b>380</b> +<...>+9'	Invoice (!)
#5	ALI+++ <b>79E</b> '	Discrepancies or adjustments.
#7	RFF+ <b>IV</b> :<...>'	Reference to the corresponding invoice
#8	DTM+171:<...>:102'	
	...	
#39	LIN+1++<GTIN1>:SRV'	
#41	IMD+F++IN::9:<...>'	
#43	QTY+47:<45>'	
#54	PRI+ <b>AAA</b> :<2>'	Difference between erroneous and correct unit price.
#54	PRI+ <b>AAB</b> :<2>'	
#66	MOA+125	

## 4. Example 4: Correct “under invoicing” (quantity)

#2	BGM+ <b>380</b> +<...>+9'	Invoice (!)
#5	ALI+++ <b>79E</b> '	Discrepancies or adjustments.
#7	RFF+ <b>IV</b> :<...>'	Reference to the corresponding invoice
#8	DTM+171:<...>:102'	
	...	
#39	LIN+1++<GTIN1>:SRV'	Difference between erroneous and correct quantity. E.g. 5 units were forgotten to be invoiced.
#41	IMD+F++IN::9:<...>'	
#43	QTY+ <b>47</b> :<3>'	
#54	PRI+ <b>AAA</b> :<...>'	Net price
#54	PRI+ <b>AAB</b> :<...>'	Gross price
#66	MOA+125	
	...	

## 2. Fully crediting and fully re-invoicing

This method consists in:

- **first** sending a CN.

The CN completely cancels the erroneous invoice. The CN is an exact copy of the initial invoice (showing the errors in the exact same way as in the erroneous invoice), but should only contain QTY+47 segments and no QTY+46 (or QTY+194) and takes as header:

#2	BGM	1001 = <b>381</b> ("Credit note - goods and services") Note: Assign a new document number.
#5	ALI	4183 = <b>79E</b> ("Discrepancies or adjustments")
#6	FTX+TXD++Btw terug te storten [...]"	Reference to legal mention
#7	RFF	1153 = <b>ON</b> ("Order number") 1153 = <b>AAK</b> ("Despatch advice number") 1153 = <b>IV</b> ("Invoice Number")
#8	DTM	Date/time of this Reference

- **next** send the correct NEW invoice (with the **correct** quantities and **correct** prices, included all information pertaining to allowances and charges). The following segments **must** be present:

#2	BGM	1001 = <b>380</b> ("Invoice") 1004 = <Reference Number of the (new) invoice> - this number has to be different from the initial erroneous invoice.
#5	ALI	4183 = <b>79E</b> ("Discrepancies or adjustments (EAN Code)")
#7	RFF	1153 = <b>ON</b> ("Order number")
#7	RFF	1153 = <b>AAK</b> ("Despatch advice number")
#7	RFF	1153 = <b>IV</b> (Reference number of the <b>initial erroneous</b> invoice)

About the document date: As the initial invoice is completely cancelled, a NEW invoice is to be generated, the document date of which is that of the NEW invoice. (The latter bears its importance, in that it will be used as the reference point for validity periods)

About the references: It is NOT necessary to link the newly created correct invoice to the preceding CN. However, in light of the O2C philosophy, it is necessary to refer to the related ORDERS (ordering number), DESADV (despatch advice number) and the initial, erroneous invoice (invoice number).

**Note:** According to the VAT administration, the (formerly third) method "**partially crediting and partially re-invoicing**" is not valid.

## 20. Debit note

The VAT administration allows the use of the debit note as described below. However, an **even better method**, provided it's bilaterally agreed, would be that (in time) the buyer issues a **self billing CN** (indicated with BGM+261) (rather than issuing a debit note).

Current practice:

- supplier sends invoice
- retailer sends debit note to supplier (to request a CN)
- supplier sends a CN and refers to the debit note.

## 21. Self billing

A "self billed" invoice (indicated with BGM+389) means that the buyer issues the invoice message (instead of the supplier). Although legally acceptable, this method requires further in depth analysis before deployment.

§ 1er. La facture (1) et le document visé à l'article 2 portent les mentions suivantes :

1° la date à laquelle ils sont respectivement émis ou établi (2) et un numéro séquentiel, basé sur une ou plusieurs séries qui identifie ces documents de façon unique, sous lequel ils sont inscrits au facturier de sortie du fournisseur ou du prestataire de services (3);

2° le nom ou la dénomination sociale du fournisseur de biens ou du prestataire de services (4), l'adresse de son siège administratif ou social (5) et son numéro d'identification à la taxe sur la valeur ajoutée visé à l'article 50 du Code (6);

2°bis lorsque le redevable est le fournisseur de biens ou le prestataire de services qui n'est pas établi en Belgique et que:

a) il a fait agréer un représentant responsable dans le pays conformément à l'article 55, § 1er ou § 2, du Code, l'identité et l'adresse de ce représentant responsable (8) et l'indication de sa qualité (7);

b) il est représenté par une personne préalablement agréée conformément à l'article 55, § 3, du Code, l'identité, l'adresse (8) et le numéro d'identification à la taxe sur la valeur ajoutée attribué à cette personne (9) et l'indication de sa qualité (7);

3° le nom ou la dénomination sociale, l'adresse (11) et le numéro d'identification à la taxe sur la valeur ajoutée visé à l'article 50 (12), du Code, du cocontractant (10) ou, en cas de livraisons visées à l'article 39bis, alinéa 1<sup>er</sup>, 4<sup>o</sup>, du Code, le nom ou la dénomination sociale, l'adresse (11) et le numéro d'identification à la taxe sur la valeur ajoutée, attribué à l'assujetti dans l'Etat membre de destination des biens (12)

3°bis lorsque le redevable est le cocontractant qui n'est pas établi en Belgique et que :

a) il a fait agréer un représentant responsable dans le pays conformément à l'article 55, § 1er ou § 2, du Code, l'identité et l'adresse (**14**) de ce représentant responsable et l'indication de sa qualité (**13**);

b) il est représenté par une personne préalablement agréée conformément à l'article 55, § 3, du Code, l'identité, l'adresse (**14**) et le numéro d'identification à la taxe sur la valeur ajoutée (**15**) attribué à cette personne et l'indication de sa qualité (**13**);

4° a) pour les opérations visées à l'article 21, § 2, du Code, le numéro par lequel le preneur (**10**) est identifié à la taxe sur la valeur ajoutée et sous lequel le service lui a été rendu (**12**);

b) pour les opérations visées à l'article 39bis, alinéa 1er, 1°, du Code, le numéro par lequel l'acquéreur (**10**) est identifié à la taxe sur la valeur ajoutée dans un autre Etat membre (**12**);

c) en cas d'application de la disposition prévue à l'article 25ter, § 1er, alinéa 2, 3°, du Code, une référence à l'application de cette disposition (**16** ou **16'**), le numéro par lequel l'assujetti est identifié à la taxe sur la valeur ajoutée dans un autre Etat membre et sous lequel il a effectué l'acquisition intracommunautaire et la livraison subséquente des biens, et le numéro par lequel le destinataire de la livraison est identifié à la taxe sur la valeur ajoutée, conformément à l'article 50 du Code (**10**) (**12**);

5° la date à laquelle intervient le fait générateur de la livraison de biens (**17**) ou de la prestation de services (**18**) ou la date de l'encaissement de tout ou partie du prix (**19**), dans la mesure où une telle date est déterminée et différente de la date de l'émission de la facture ;

6° les éléments nécessaires pour déterminer l'opération et le taux de la taxe, notamment la dénomination usuelle des biens livrés (**20**) et des services fournis (**20**) et leur quantité (**21, 22 et si applicable 23**) ainsi que l'objet des services (**20**);

7° les données énumérées à l'article 8bis, § 2, du Code pour les livraisons de moyens de transport visés à l'article 8bis, § 1er, du Code, ainsi que la marque, le modèle, la cylindrée, la puissance du moteur et le numéro de châssis pour la livraison de voitures ou de voitures mixtes, neuves ou d'occasion, et la date de la première mise en circulation pour les voitures d'occasion et les voitures mixtes d'occasion et, pour les travaux autres que le lavage, relatifs à des véhicules à moteur, l'indication du numéro de la plaque minéralogique du véhicule (**Non applicable dans l'HO2C INVOIC**);

8° pour chaque taux ou exemption, la base d'imposition (24), le prix unitaire hors taxe (25) (26), ainsi que les escomptes (29), rabais ou ristournes éventuels s'ils ne sont pas compris dans le prix unitaire (27) (28);

9° l'indication des taux de la taxe (30) et le montant total des taxes à payer ou à régulariser (31). Le montant total des taxes à payer ou à régulariser doit être exprimé dans la monnaie nationale de l'Etat membre qui détermine les règles applicables à l'émission des factures conformément à l'article 53decies, § 1er, du Code (38);

9°bis (abrogé); la mention "Autoliquidation" en lieu et place de l'indication des taux et du montant total des taxes dues lorsque la taxe est due par le cocontractant (32);

9°ter la mention "Autofacturation" lorsque le cocontractant émet la facture au nom et pour le compte du fournisseur ou du prestataire (33);

10° l'indication de la disposition pertinente de la directive ou de la disposition nationale correspondante en vertu de laquelle l'opération est exonérée de la taxe ou toute autre mention indiquant que l'opération est exonérée (34) ou (34');

10°bis en cas d'application du régime particulier des agences de voyages, la mention "Régime particulier - Agences de voyages" (**Non applicable dans l'HO2C INVOIC**);

10°ter en cas d'application du régime particulier applicable dans le domaine des biens d'occasion, des objets d'art, de collection ou d'antiquité, respectivement la mention "Régime particulier – Biens d'occasion", "Régime particulier – Objets d'art" ou "Régime particulier – Objets de collection et d'antiquité" (**Non applicable dans l'HO2C INVOIC**);

11° une référence à la pièce ou aux pièces antérieures, lorsque plusieurs factures ou documents sont émis ou établis pour la même opération (35). La facture ne peut débiter le cocontractant, à titre de taxe, d'un montant dont il a été débité antérieurement;

12° toutes autres mentions prescrites en exécution du Code de la taxe sur la valeur ajoutée ou des arrêtés pris pour son exécution (36) ou (36').

§ 3. Dans le cas de lots comprenant plusieurs factures électroniques transmises au même cocontractant ou mises à sa

disposition, les mentions communes aux différentes factures peuvent être reprises une seule fois dans la mesure où, pour chaque facture, la totalité de l'information est accessible (37).

### **Directive 2001/115/CE du Conseil du 20 décembre 2001**

#### **Article 2, Par 2, point b)**

(38) Les montants figurant sur la facture peuvent être exprimés dans toute monnaie, pour autant que le montant de taxe à payer soit exprimé dans la monnaie nationale de l'Etat membre où se situe le lieu de la livraison de biens ou de la prestation de services en utilisant le mécanisme de conversion prévu à l'article 11, C (2).

## Introduction :

The Harmonised Order to Cash (HO2C) INVOIC MIG enables a **uniform implementation** of the EDI invoice for all actors in the Belgian and Luxembourgian Fast Moving Consumer Goods and Food Service sectors.

The MIG is fully compliant to EANCOM 2002 but much more refined/precise.

HO2C is a **subset** (= "filter") of EANCOM 2002, so many segments, data elements and code qualifiers that exists in EANCOM 2002 can't be used in HO2C.

## **Abbreviations :**

- **MIG** = Message Implementation Guideline
- **DE** = Data Element
- **SG** = Segment Group

## **Columns :**

The following columns are present throughout the MIG:

- |  |  |
|--|--|
| 1. <b>Segm.#</b> (Segment number):             | as in "full" EANCOM 2002 INVOIC message    |
| 2. <b>Segm.</b> (Abbreviation segment name) :  | as in EDIFACT / EANCOM 2002 INVOIC message |
| 3. ( <i>if present</i> ) <b>Composite DE</b> : | "  |
| 4. <b>DE</b> (Data Element Number):            | "  |
| 5. <b>DE Name</b> :                            | "  |
| 6. <b>MaxUse</b> :                             | "  |

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value		Meaning	Type	Length
--------	-------	--------------	----	------------------------	--------	----------	-------	--	---------	------	--------

**7. Belgilux:** Describes the status of each **segment** and **DE** for the O2C INVOIC MIG.

- **Segment status:** A segment is either 'M' (mandatory) or 'C' (conditional).

- \* Each mandatory segment has an explicit '**M**' indicated in the Belgilux column. This implies that the segment always has to be mentioned.
  - \* Conditional segments have '**C**' in the Belgilux column, they are only to be used when the condition specified in the segment note below is met. In case there is 'no specific condition to be met', the segment is used when it's relevant to do so. (E.g. #17 **CUX** DTM)

**- DE status:** A DE is either 'R' (required), 'D' (dependent), 'O' (optional) or 'N' (not used).

- \* **Required (R)** DEs/values have to be mentioned (provided the segment is used).
  - \* **Dependent (D)** DEs/values have to be mentioned in case the dependency specified in the segment note below, is met.
  - \* **Optional (O)** DEs/values may be mentioned if the sender wishes to do so, but may as well stay empty (= be skipped).
  - \* **Not used (N)** DEs can either be used in EDIFACT but not in global EANCOM 2002, or are not retained in the scope of this national HO2C MIG. These DEs are in **grey** to stress their non-occurring and for improved user comfort.

The status of the DE is repeated for each predefined value/code qualifier (see 8). All code qualifiers that have to be mentioned (depending if the condition is met), need to be described in that DE by repeating the entire segment.

## 8. Value:

- The DE either has a **predefined value** (from the '[EBL001 code list](#)' or 'Data Elements & Code Sets directory - EANCOM 2002 edition 2012' or other code lists),
  - or a value filled out as <..> because it is different each time (e.g. dates, document number, ...).  
Similarly, all GS1 Identification Keys have already been filled in as <**GTIN**> or <**GLN**>.

- Note that the (predefined) values taken up in this MIG are considered to **cover all user requirements** for the Belgilux FMCG and Food service sectors.  
That is why, unlike EANCOM, this MIG does not take up the notions "open" and "restricted" code lists, since all relevant codes are already explicitly defined in the MIG.

| 10. DE type :

as in EDIFACT / EANCOM 2002 INVOIC message

**11. DE length :**

11

## 12. Segment notes:

For information purposes, legally required mentions are indicated with "Cf. Rule X". This refers to document "Annex mapping rules for KB/AR 1 Art.5".

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length	
<b>Changelog:</b>											
V3	20	08	2019	- IMD (#41) changed link to codelist of controlling agencies, codes and names (page 40) to <a href="https://ec.europa.eu/agriculture/ofis_public/actor_cbeu/ctrl.cfm?targetUrl=home">https://ec.europa.eu/agriculture/ofis_public/actor_cbeu/ctrl.cfm?targetUrl=home</a> from <a href="http://ec.europa.eu/agriculture/ofis_public/r8/EU_ControlBodies.pdf">http://ec.europa.eu/agriculture/ofis_public/r8/EU_ControlBodies.pdf</a> - DTM (#45) adjust row height so that value DTM+35 becomes visible as accepted value							
V3	1	06	2019	- DTM (#3) extended dependency notes DE 2005 about collective invoicing scenario + remove code value 203 DE 2379 - FTX (#6) extended segment notes with business rule for VAT pay back to the state in case of credit notes - DTM (#8) added segment note - RFF (#11) changed status code VA from R to D + changed dependency note - SG 8 (PAT-DTM-PCD-MOA): multiple correction in all segments to make the usage of segment coherent. - MOA (#37) changed segment note about conditional relation to segment TAX (#36) - LIN (#39) extended dependency notes DE 7140 and DE 7143 - PIA (#40) changed URL RTI list - IMD (#41) switched status DE 7008 from D to R + deleted dependency note - MEA (#42) added some additional info to the segment note - QTY (#43) entire rewrite of dependency notes - PRI (#54) changed status segment from C to M + added some additional info to the dependency note of DE 5284 - RFF (#56) removed code value ALO and dependency note DE 1153 + clarified usage of segment in segment notes - MOA (#66) changed segment note about conditional relation to segment TAX (#65) - ALC (#69) changed status DE 7160 from O to N - RTE (#75) rewritten segment notes - MOA (#77) changed segment note about conditional relation to segment TAX (#76) - MOA (#83) added remark that negative invoices are not allowed. + added code 176 to DE 5025 + changed status of DE 6343 and 6345 from O to DE + added code 10E to DE 6343 and EUR to DE 6345 + added dependency notes to DE 5025, DE 6343 and DE 6345 - TAX (#86) changed status from M to C + extended segment note about conditional usage - MOA (#87) changed status from M to C + changed segment note about conditional relation to segment TAX (#86) + re-added code B10 together with a dependency note to DE 5025							
V2.0	1	04	2017	- All unused data-elements: added N in status and changed font color to grey to enhance user readability - UNB: DE 0026 changed values from to INVDMT_V1 to INVDMT_V2 and INVMAT_V1 to INVMAT_V2 - ALI (#5) changed MaxUse from 35 to 5. - NAD (#9) added code UC to DE 3035 and added dependency note.							

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
				- CUX (#16) changed status from C to M.						
v1.2	01 Jul 2015			- RTE (#75) added and RTE (#35) deleted. - BGM (#2) DE 1001 code value 7 deleted.						
v1.1	01 Nov 2014			- RFF (#7) DE 1153 code value PQ added.						
v1.0	01 Jan 2014			Release of the harmonized O2C INVOIC. Discrepancies in regards to former IDEAL INVOIC: - UNB and UNZ added. UNB DE 0026 values deleted. - For each segment, status specified. - For each DE, status of each code value specified. For every code value with status 'D', requirement/condition specified. - BGM (#2) DE 1001 code values 383, 389, 261 and 527 on status 'N'. DE 1225 code value 7 added. - FTX (#6 and #48) DE 4451 code value ACB deleted, DE 4441 and DE 3055 values deleted. - FTX (#6) DE 4451 code values AAI and PMT added. - RFF (#7) DE 1153 code values CT and SSC deleted. - NAD (#9) DE 3035 code value SF added. Code values CN and LG deleted. - FII (#10) DE 1131 code value 25 and DE 3055 code value 5 added. DE 3055 code value 17 deleted. (International alignment) - RFF (#11) DE 1153 code values XA and YC1 added. - PAT (#18) DE 4279 code values 1 and 69 deleted. - PCD (#20) DE 5245 code values 7 and 16 deleted. - MOA (#21) DE 5245 code value 21 replaced by 201. - TOD (#28) added. - RTE (#35) added. - PIA (#40) DE 7143 code values IN and SA added. Code value XZ5 replaced by SUE. - IMD (#41) DE 7009 code value RD added. - MEA (#42) DE 6311 code value PD deleted. - QTY (#43) DE 6063 code value 194 added. - MOA (#49) DE 5025 code value B02 deleted. - PRI (#54bis) deleted. - RFF (#56) DE 1153 code value ALQ deleted. Code value ALO added. - TAX (#65, #76 and #86) DE 5305 code value AE added. - NAD (#67) deleted. - ALC (#69) DE 7161 code value DI added. - MOA (#74) DE 5025 code value 35E deleted. - MOA (#83) DE 5025 code values 21, 86 and 176 deleted. - MOA (#87) DE 5025 code value B10 deleted. Code value B09 replaced by 04G and code value 150 replaced by 124. - MOA (#90) DE 5025 code value 8 deleted.

BGM		1225		Message function code	R		<b>9</b> = Original		AN	1>3
BGM		4343		Response type code	N				AN	1>3

This segment is used to indicate the type and function of a message and to transmit the identifying number.

#### Segment notes:

The use of this segment is mandatory. (Cf. Rule 1 & 3).

#### Dependency notes:

- **DE 1001:** In case of a **commercial invoice**, mention 380. In case of a **credit note**, mention 381.

Code values '383, 389, 261 and 527' (respectively representing debit note, self-billed invoice, self-billed credit note and self-billed debit note) require further in-depth analysis and guidelines before putting it to use.

All references other than 'the document number in DE 1004' are to be put in the RFF segment (#7).

- **DE 1225:** If, for one reason or another, the 'issuer of the invoice' resends an invoice, the practice shows that an invoice is simply resent using the same 'original' status '9'. The invoice 'booked' at retailer side is considered as the original/final one.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
<b>3 DTM</b> <b>Date/time/period</b> <b>35 M</b>										
DTM	C507			Date/time/period	R					
DTM	C507	2005		Date or time or period function code qualifier	D D R D R		1 = Actual service completion date/time 35 = Actual delivery date/time 137 = Document/message date/time 263 = Invoicing period 454 = Accounting value date		AN	1>3
DTM	C507	2380		Date or time or period value	R		<..>		AN	1>35
DTM	C507	2379		Date or time or period format code	D D		102 = CCYYMMDD 718 = CCYYMMDD-CCYYMMDD		AN	1>3

This segment is used to specify the date (or period) of the invoice.

Segment notes:

**DE 2005:** Identification of the 'Document/message date/time' (code value **137**) and the 'Accounting value date' (code value **454**) are required.

Code value 454 is considered as the official invoice date. (Cf. rule 2, 17 & 18)

Dependency notes:

- **DE 2005:**

\* At least code value 35 (in case of goods) and/or code value 1 (in case of services) is/are required.

Even if the **delivery/completion date** is the same as the document message date, both dates need to be mentioned in the invoice.

If the delivery/completion date (35 or 1) is present on both header and line level, then the date on line level precedes the one on header level.

\* Code value 263 is used for "collective invoicing" when one invoice is used to invoice the articles/services of several orders. This invoice scenario doesn't comply with a basic principle of HO2C that states 1 ORDERS <> 1 DESADV <> 1 INVOIC.

Retailers/Food Service providers won't ask suppliers to send collective invoices. Suppliers can request buyers to accept collective invoices, but can't enforce it.

- **DE 2379:** It's recommended to use **date format 102**

For "collective invoicing", use 'DE 2005 = 263' in combination with 'DE 2379 = 718'.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
<b>5 ALI Additional information 5 C</b>										
ALI		3239	Country of origin name code		N				AN	1>3
ALI		9213	Duty regime type code		N				AN	1>3
ALI		4183	Special condition code	R		79E	= Discrepancies or adjustments (GS1 Code)		AN	1>3
ALI		4183	Special condition code	N					AN	1>4
ALI		4183	Special condition code	N					AN	1>5
ALI		4183	Special condition code	N					AN	1>6
ALI		4183	Special condition code	N					AN	1>7

This segment is used to specify any special conditions which apply to the goods being invoiced.

Segment notes:

**Only use** this segment when the document **corrects excess or under invoiced errors**.

In other words, mention ALI+++79E' in the additional invoice (correcting under invoiced errors), or in the credit note (correcting excess price or quantity errors) and in the 'possibly following corrected' invoice.

	FTX		3453	Language name code	O		<..> EN for English, FR for French,...		AN	1>3
	FTX		4447	Free text format code	N				AN	1>3

This segment is used to provide free form or coded text information for the entire invoice.

Apart from the below applications, the use of this segment in free form is not recommended since it may inhibit automatic processing of the invoice.

#### Segment notes:

##### **Only use FTX (#6) to:**

- mention a VAT exemption if and only if no coded reference exists (e.g. to indicate VAT exemption with its corresponding EU article in full text):  
If so, mention in DE 4451 'TXD' and in C108 DE 4440 'the full written article for VAT exemption'. Optionally add 'language name code' in DE 3453.  
Mention in (#36) TAX segment code value 'FTXHD' (to refer to #6 FTX for tax information). (Cf. rule 34').  
Do note however that ideally the correct indication of VAT exemption is by mentioning the corresponding code (e.g. from the [EBL001 code list](#)) in the TAX segment. (Cf. rule 34).
- mention on credit notes, only for all cases defined by article 79 from the VAT code, that the VAT needs to be paid back to the state if  
the VAT of the invoice has already been recovered.

validation rule: # 2 BGM+381 and # 83 MOA+150 > 0.

If so, mention in DE 4451 'TXD' and in C108 DE 4440 'Btw terug te storten aan de staat in de mate waarin ze oorspronkelijk in aftrek gebracht werd' or  
'TVA à reverser à l'Etat dans la mesure où elle a été initialement déduite'. Optionally add 'language name code' in DE 3453.  
e.g. # 6 FTX+TXD+++Btw terug te storten aan de staat in de mate waarin ze oorspronkelijk in aftrek gebracht werd'

RFF	C506	1060		Revision identifier	N				AN	1>6

This segment is used to specify references which relate to the whole invoice, for example Purchase Order Numbers (code value 'ON'), Delivery Numbers (code value 'AAK'), etc.

#### Segment notes:

Cf. rule 35.

#### Dependency notes:

##### **DE 1153:**

- invoice (BGM+380): at least RFF+ON is required. And RFF+AAK if a despatch advice (DESADV) or RFF+ALO if a receiving advice (RECADV) was used.  
Additionnally mention ACE in case of a reservation order to refer to the agreement.  
Those codes should also be mentioned on a newly created invoice that corects an initial invoice that contains several errors and needs to be credited entirely.  
Additionnally mention DL in case an aditionnal invoice is preceded the credit note (cf. rule 35),  
Optionally mention PQ in case the invoicee needs to mention a structured reference upon executing the payment (provided it was bilaterally agreed beforehand).  
- credit note (BGM+381), always mention the invoice number (IV) it corresponds to (Cf. rule 35). In case one cannot refer to the initial invoice, mention RFF+IV:NA' (=Not Available).  
Additionally mention:  
\* ACE in case of non-returned damaged goods to refer to the explanatory document.  
\* ALQ in case of returned goods or empties to refer to the return notice.

This segment is used to identify the trading parties involved in the invoice process.

Segment notes:

Identification of the **invoicee** (IV), **buyer** (BY) and **supplier** (SU) of goods and services is mandatory in the invoice.

Additionally, **the buyer's agent/representative** (AB) and/or **the delivery party** (DP) must be identified if different from the buyer (BY).

Additionally, **the issuer of the invoice** (II) and/or **the supplier's agent/representative** (SR) must be identified if different from the supplier (SU).

(Cf. mapping rules KB/AR 1 art. 5: 4, 5, 7, 8, 10, 11, 13 & 14)

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
In case of home delivery the segments NAD+DP and NAD+UC are used to flag a specific subscenario:										
					NAD+DP		NAD+UC			
1) delivery address = invoice address end consumer					Dummy GLN 00000000000000		Dummy GLN 00000000000000			
					No address in plain text		Address in plain text			
2) delivery address ≠ invoice address end consumer (can be relative or work)					Dummy GLN 00000000000000		Dummy GLN 00000000000000			
					Address in plain text		Address in plain text			
3) delivery address is shop					Real GLN shop or DC 00000000000000		Dummy GLN 00000000000000			
					Address in plain text		No address in plain text			

#### Dependency notes :

- The following composites and data elements are only used when name and address have to be communicated as text: C080 - C059 - 3164 - C819 - 3251 - 3207.  
It should be noted that this textual information, **together with its corresponding GLN**.  
It is mandatory for the parties IV, BY, SU, AB, DP, II, SR, UC (when mentioned) in order to be compliant with the Belgian law on invoices.

Exceptions in case of home delivery order:

- \* For NAD+DP when the delivery address is the same as the invoice address of the end consumer.  
In that case NAD+DP is only used to flag this subscenario and no name or address can be added. Name and address can only be added in NAD+UC.
  - \* For NAD+UC when the delivery address is a shop - recognisable by the real GLN used in DE3039 of NAD+DP.  
In that case NAD+UC is only used to flag this subscenario and no name or address can be added. Name and address can only be added in NAD+DP.

- DE3035: the code UC can only be used for home delivery.

FII	C088		3436	Institution branch location name	O				AN	1>70
FII			3207	Country name code	N				AN	1>3

This segment is used to identify financial institution information related to the party identified in the NAD segment (#9).

Segment notes:

**Always mention IBAN** (International Bank Account Number) & **BIC** (Bank Identifier Code, formerly known as 'SWIFT' code) for the issuer of the invoice (i.e. NAD+SU, or NAD+II if present).

If FII+RB+<IBAN>+:::<BIC>:25:5' is provided for both NAD+II and NAD+SU, the information of NAD+II precedes.

Note that per the Belgian law, a bank account number (IBAN) of the issuer of the invoice must be provided in an invoice.

As for BIC, it is recommended to mention it in the invoice.

However, as Financial institution information is part of the **Master Data**, and as such already known by both partners before the exchange, normally it will not be read by the receiving party (= invoicee or 3rd party).

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
					99					
					9999					
					1 C

	RFF	C506	1060	Revision identifier		N			AN	1>6

This segment is used to identify financial institution information related to the party identified in the NAD segment (#9).

Segment notes:

Remark: The **VAT number (VA)** is mandatory for all parties that are liable for VAT involved in the payment, in particular for the invoicee (IV), the supplier (SU) and the buyer (BY), and if present for the 'issuer of the invoice' (II). (Cf. rules 6, 9, 12, 15).

Dependency notes:

**DE 1153:**

- VA/XA: always mention VA (= VAT registration number), except when the company is not liable for VAT. In that case, the company doesn't have a VAT registration number and XA (= company registration number) must be mentioned.
- YC1: only mention YC1 if the 'supplier identification' requires (for one reason or another, and provided it's bilaterally agreed) an additional distinction next to the GLN.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length

CUX		5402		Currency exchange rate		D		<..> Rate of exchange	N	1>12
CUX		6341		Exchange rate currency market identifier		N			AN	1>3

This segment is used to specify currency information for the complete invoice.

Segment notes:

Always mention this segment!

- For **national trade**, mention the invoicing currency as such: CUX+2:EUR:4' (Cf. rule 38). (Note that the second presence of C504 and DE 5402 is not used then.)
- For **international trade** in which the invoicing currency is *not euro*, mention the second presence of C504 and DE 5402 (rate of exchange) within the same segment line.

In other words, there is only one occurrence of the CUX segment when specifying Reference and Target Currencies for international trade.

General rule: **Reference Currency × Rate of exchange = Target Currency.**

Example: CUX+2:USD:4+3:EUR:10E+0,8494'

(Strictly speaking, syntactically, code 10E cannot be used as it is not part of the restricted codelist for this DE in EANCOM 2002.)

	PAT	C112	2151	Period type code	R		D	= Day		
	PAT	C112	2152	Period count quantity	R		<..>			

This segment is used by the issuer of the invoice to specify the payment terms for the complete invoice.

#### Dependency notes:

- DE 4279: indicate the type of payment terms:

\* 3: there is no financial impact when the due date is not met

\* 20: a charge (penalty) will be charged when the due date is not met

\* 22: a discount (conditional allowance) will be granted when the due date is met

code value '22' (discount) can only be used to indicate 'conditional allowance' (also known as 'payment discount'), not for commercial allowances/discounts.

'conditional allowance' (= discount for paying early, payment is made within a time frame designated as prompt pay)

use PAT+22' in combination with (#31) ALC+A++++EAB'. Check the annex 'INVOIC examples' for more information.

- C112: This composite data-element should be used when a relative date linked to the payment terms, is used

When this composite data-element is used, #19 DTM cannot be used to indicate an absolute date

If used, note that the 'date of invoice' (DE 2475 = 5 ) refers to the invoice date of (#3) DTM+454.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length

PCD		4405	Status description code		N				AN	1>3

This segment is used to specify percentages which will be allowed or charged if the invoicee pays (does not pay) to terms.

Segment notes:

This segment can only be used in combination with #18 PAT+20 or PAT+22.

A payment discount (conditional allowance) can only be expressed as a percentage using this segment # 20 PCD.

A payment charge can either be mentioned as a percentage using this segment # 20 PCD or as an amount using # 21 MOA. Hence only one and not both segments can be used.

Dependency notes :

- **DE 5245:** Code value '12' can only be used if **DE 4279** of the preceding PAT segment (#18) has code value **22** (= discount).  
Code value '15' can only be used if **DE 4279** of the preceding PAT segment (#18) has code value **20**. (= penalty terms)

	ALC	C214	3055	Code list responsible agency code	D			<b>281</b> = GS1 Belgium & Luxembourg	AN	1>3
	ALC	C214	7160	Special service description	O				AN	1>35
	ALC	C214	7160	Special service description	O				AN	1>35

This segment is used to indicate any Allowances or Charges applicable to the total invoice.

A charge or allowance is either defined as a percentage (#33 PCD) or as a monetary amount (#34 MOA), but never both.

Segment notes : **WARNING!** Contrary to common EANCOM practice, allowances or charges specified in the detail section (SG 39).

Do NOT override or replace allowances or charges specified at header level, but complement them.

- **DE 5463:** Mention A if it concerns an allowance, C if it concerns a charge. (Cf rules 27, 28, 29)

- **DE 1227:** Provide a calculation sequence when relevant: 1 = first step of calculation (initial gross amount is allowance/charge basis), 2 = 2nd step ...

- **DE 7161:** Either mention a code value from the **EBL001 code list**, or one of the EANCOM codes defined here above.

Code value 'EAB' can only be used if (#18) PAT has code value '22' (meaning 'conditional allowance'). It allows to link the ALC group (SG 16) to the PAT segment (#18).

- **DE 3055:** If an **EBL001 code** is used (e.g. '013' meaning Recupel), then mention in DE 3055 code value '281' (= GS1 Belgium & Luxembourg code).

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
					9999					
					1					
					1 C					
SG16	ALC-SG19-SG20-SG22									
SG19	PCD									
33	PCD			Percentage details						
PCD	C501			Percentage details		R				
PCD	C501	5245		Percentage type code qualifier		D		1 = Allowance		
						D		2 = Charge

PCD	C501	1131		Code list identification code		O			AN	1>17
PCD	C501	3055		Code list responsible agency code		D			AN	1>3

This segment is used to specify any percentage discounts or charges for the current ALC segment group.

A charge or allowance is either defined as a percentage (#33 PCD) or as a monetary amount (#34 MOA), but never both.

#### Segment notes:

**Only use this segment** to indicate an **allowance/charge %**. Note: a conditional allowance (%) is to be mentioned in the payment terms section #20 PCD.  
This segment is not used in other cases.

#### Dependency notes:

- **DE 5245:**
  - Code value '1' can only be used if DE 5463 of the preceding ALC segment (#31) has code value 'A'.
  - Code value '2' can only be used if DE 5463 of the preceding ALC segment (#31) has code value 'C'.

	MOA	C516	4405	Monetary amount type code qualifier		N			AN	1>3

This segment is used to indicate the taxable amount upon which the corresponding VAT rate (of #36) will be applied.

#### Segment notes:

This segment can only be used if preceding TAX segment (#36) of Segment Group 22 is used.  
(Cf. Rules 27 and 28).

#### Dependency notes:

- **DE 5025:**
  - \* Code value '23': can only be used if DE 5463 of the preceding ALC segment (#31) has code value 'C'.
  - \* Code value '204': can only be used if DE 5463 of the preceding ALC segment (#31) has code value 'A'.
  - \* Code value '52' is only used for conditional allowance. I.e. if (#31) ALC+A++++EAB' is used. This distinction is necessary for the VAT calculation rules.

LIN			1222	Configuration level number	N				N	1>2
LIN			7083	Configuration operation code	N				AN	1>3

This segment is used to identify the item being invoiced.

The detail section is formed by a repeating group of segments, always starting with a LIN segment.

#### Segment notes:

The use of this segment is mandatory.

#### Dependency notes:

**DE 7140 and DE 7143:** Always mention a **GTIN** and code value 'SRV' for trade items as well as consumer empties, **except for RTI** (= logistic supports).

- In the case of **consumer empties** the supplier has to choice to use the same GTIN as the trade item or to allocate a seperate GTIN.

However the latter is considered as the recommended solution.

In both cases the invoiced consumer empty can be detected, because DE 7009 of # 41 IMD has to contain code qualifier:

\* RD (= refundable deposit item) in case of consumer empties

\* IN (= invoicing unit) in case of trade items

- In the case of **RTI** (= logistic supports), these data elements stay blank, because an RTI is not identified with a GTIN, but a GRAI.

Example: LIN+1'. For more information, see annex 'INVOIC examples'.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length

PIA	C212		1131	Code list identification code	O				AN	1>17
PIA	C212		3055	Code list responsible agency code	O				AN	1>3

This segment is used to provide additional identification for the current line item.

Segment notes:

Ideally the retailer is to make the **GN code** (= Intrastat code) part of the required Master Data in **GDSN**.

However, should this not be the case, then the issuer of the invoice can (optionally) indicate the GN code via EDI, in PIA DE 7140, followed by DE 7143 = HS.

The **GN code** assigned to the line item, allows the invoicee to check if the correct VAT percentage has been applied.

*This segment is used to provide additional identification for the current line item.*

#### Segment notes:

Although the GTIN serves the purpose of uniquely identifying trade items, some **bilaterally agreed business cases** require additional article identification. This is e.g. the case for product variants sharing the same GTIN.

## Segment notes:

This segment line is used to invoice or credit (empty) RTI/assets e.g. pallets or crates. There is no link to the articles it carried.

The RTI list can be downloaded over here:

<https://www.gs1belu.org/nl/standaarden/granen>

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
<b>SG26 LIN-PIA-IMD-MEA-QTY-DTM-FTX-SG27-SG29-SG30-SG33-SG34-SG39</b>

MEA	C174	6432	Significant digits quantity		N				N	1>2
MEA		7383	Surface or layer code		N				AN	1>3

This segment is used to specify the multiplying factor of articles ordered and delivered in pieces, but invoiced in physical dimensions (liter/meter/kilogram) or the other way around.

#### Segment notes:

Only use this segment if a **conversion factor** is applied in the invoice.

This scenario is used when a recalculation from delivered pieces to invoiced physical dimensions occurs.

(Not in the credit note; since it only contains QTY+47 (or QTY+61 or QTY+124) in which the quantity is expressed in physical dimensions and no QTY+46 (or QTY+194) in which the quantity is expressed in pieces. Hence there is no option to recalculate pieces into physical dimensions.)

E.g. ordered and delivered in units or packages of 250 g, but invoiced per kg

For more information, see annex 'INVOIC examples'.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length

	QTY	C186	6411	Measurement unit code	D D D		<b>KGM</b> = Kilogram <b>LTR</b> = Liter <b>MTR</b> = Meter		AN	1>3

This segment is used to specify quantities related to the current line item.

#### Dependency notes:

mapping rules KB/AR 1 art. 5: 21, 22 and 23

calculation rules: 7: K - L - M

#### - DE 6063:

\* **QTY+47** should be mentioned on all invoice and credit note lines in all scenarios, except in case of this scenarios:

- credit note for returned goods or consumer empties/RTIs: QTY+47 is replaced by **QTY+61** in all lines

(flag: header BGM+381 & RFF+ALQ)

- credit note for damaged goods (that can be destructed): QTY+47 is replaced by **QTY+124** in all lines

(flag: header BGM+381 & RFF+ACE)

- initial invoice that includes returned consumer empties/RTIs (this is not possible for returned trade items, they always have to be mentioned on a seperate credit note):

QTY+47 is replaced by **QTY+61** only in the invoice lines that mention the returned consumer empties/RTIs

(flag: header BGM+380 & line IMD+F++RD [not allowed in combination with IMD+F++IN which refers to trade items])

- **attention:** in case of an initial invoice with semi-bulk products based on commercial average measurement (type 3b): 2 QTY+47 segments need to be mentioned:

1 in pieces and 1 with a measurement unit code referring to physical dimensions. (see dependency rules DE 6411)

\* **QTY+192** should be mentioned on top of each QTY+47 segment on invoice lines of initial invoices (flag header: BGM+380) with free goods

	FTX		3453	Language name code	O			<..>	AN	1>3
	FTX		4447	Free text format code	N				AN	1>3

This segment is used to provide free form or coded text information in regards to the line item.

Use of this segment in free form (apart from the below applications) is not recommended since it may inhibit automatic processing of the invoice.

#### Segment notes:

**Only use** FTX (#48) for a VAT exemption if and only if no coded reference exists (e.g. to indicate VAT exemption with its corresponding EU article in full text):

If so, mention in DE 4451 'TXD' and in C108 DE 4440 'the full written article for VAT exemption'. Optionally add 'language name code' in DE 3453.

Mention in (#65 or 76) TAX segment code value '**FTXLN**' (to refer to #48 FTX for tax information). (Cf. rule 34'). See INVOIC examples.

Note that ideally the correct indication of 'VAT exemption' is by mentioning the corresponding code (e.g. from the **EBL001 code list**) in the TAX segment. (Cf. rule 34).

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
				<b>SG26 LIN-PIA-IMD-MEA-QTY-DTM-FTX-SG27-SG29-SG30-SG33-SG34-SG39</b>			9999999			
				<b>SG27 MOA</b>			99			
				<b>49 MOA</b>			<b>Monetary amount</b>	<b>1 M</b>		
	MOA	<b>C516</b>		<b>Monetary amount</b>		R				
	MOA	C516	5025	Monetary amount type code qualifier		D D		<b>203</b> = Line item amount (not legally required, but useful) <b>496</b> = Total returnable packages deposit amount (used for RTI/assets <u>and</u> consumer empties)	AN	1>3

	MOA	C516	6343	Currency type code qualifier		O			AN	1>3
	MOA	C516	4405	Monetary amount type code qualifier		N			AN	1>3

This segment is used to specify monetary amounts related to the current line item.

The use of this segment is mandatory.

#### Dependency notes:

- **DE 5025:** When the LIN segment specifies a trade item, mention the 'line item amount' (with code value '203').

Note however that it's not legally required to have this amount in the invoice, which is also the reason why it's not taken up in the VAT calculation rules.

Code value '203': Item Amount = (Quantity × Unit Gross Price) + Charges - Allowances [hence **without VAT**]

- **DE 5025:** When it concerns RTI/assets and/or consumer empties, mention the Total Returnable Packages deposit amount (with code value '496').

This is used in invoices and credit notes.

*This segment is used to specify price information for the current line item.*

#### Segment notes:

**Net price and gross price** are both required. (Cf. rules 25 and 26).

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
				SG26 LIN-PIA-IMD-MEA-QTY-DTM-FTX-SG27-SG29-SG30-SG33-SG34-SG39			9999999

				56 RFF		Reference	1 C			
	RFF	C506		Reference		R				
	RFF	C506	1153	Reference code qualifier		R		ON = Order number (buyer)	AN	1>3
	RFF	C506	1154	Reference identifier		R	<..>		AN	1>70
	RFF	C506	1156	Document line identifier		O			AN	1>6
	RFF	C506	4000	Reference version identifier		N			AN	1>35
	RFF	C506	1060	Revision identifier		N			AN	1>6

This segment is used to provide references specific to the line item, and overrides any global references provided in the heading section of the invoice when the same qualifier is used.

Segment notes:

Normally the reference to an order number is mentioned at header level using # 7 RFF

This segment is used in case of "collective invoicing" when one invoice is used to invoice the articles/services of several orders. This invoice scenario doesn't comply with a basic principle of HO2C that states 1 ORDERS <> 1 DESADV <> 1 INVOIC.

Retailers/Food Service providers won't ask suppliers to send collective invoices. Suppliers can request to use collective invoicing to the buyer, but can't enforce it.

	LOC	C553	3232	Second related location name	N				AN	1>70
	LOC		5479	Relation code	N				AN	1>3

This segment is used to identify the location where the terms of delivery apply.

#### Segment notes:

The "country of departure" and the "country of delivery" need to be derivable from the INVOIC.

Therefore, in case the real 'country of departure' (respectively 'country of delivery'), is different from the country code in NAD+SU (respectively NAD+BY), then LOC+5 (respectively LOC+7) is to be mentioned on line level.  
 Even if the transport was conducted by the buyer, the 'country of departure' is still to be mentioned.  
 This information, among other data, is necessary for the invoicee to figure out which VAT rule to apply in case of VAT exemption.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
				<b>SG26 LIN-PIA-IMD-MEA-QTY-DTM-FTX-SG27-SG29-SG30-SG33-SG34-SG39</b>			9999999			
				<b>SG34 TAX-MOA</b>		99				
.	/ ..	65	TAX	Duty/tax/fee details		1				

Segment notes:

It is mandatory to mention the VAT rate (or exemption) for each occurring LIN segment, **except for RTI/assets and/or consumer empties** as they are not part of the taxable amount.

How to use **VAT indication** on line level: (either 1. or 2. applies). (Cf. rules 24 and 34).

**1. VAT is due (= NO exemption):**

- VAT rate in **DE 5278** (C243);
  - corresponding amount in following **MOA** segment (#66).
- Example: TAX+7+VAT+++:::6.00'

**2. Exemption from VAT:**

- 2.1. In case of a CODED reference: DE 5279 = (pick value from **EBL001 code list**), followed by DE 3055 = "281"
  - 2.2. In case of a NON CODED reference: **DE 5279 = "FTXLN"**. (Referring to FTX (#48) segment at line level for textual description.)
- Example: TAX+7+VAT+++BF35:::281'

Which 'articles of the law' to use in case of VAT exemption?

Any appropriate reference to the article of the law, granting exemption from VAT, is valid, whether it's from a national (e.g. **EBL001 code list**) or a European Directive. However, tax analysts recommend to mention the appropriate article from the European Directive (2006/112/EC), rather than the national Directive. For now, an article from the European Directive can only be mentioned in free text (#48). Nevertheless, GS1 and CEN are currently updating a CEN codelist.

Dependency notes:

- **DE 3055**: This DE is only used when DE 5279 contains a code from the **EBL001 code list**.
- **DE 5278**: This DE is only used when the line item is subject to VAT. (Whereas **DE 5279** is applied when there's VAT **exemption**)
- **DE 5305**: This DE is only used in case of **Reverse Charge**. (Cf. KB1 Art. 20, Art. 20bis and Art. 20ter).

Segment notes:

This segment can only be used if the preceding ALC segment (#69) of Segment Group 39 is used

How to use **VAT indication** on an Allowance or a Charge (either 1. or 2. applies) (Cf. rules 27, 28 and 34).

**1. VAT is due (= NO exemption):**

- VAT rate in **DE 5278** (C243);
  - corresponding VAT amount in following **MOA** segment (#77).
- Example: TAX+7+VAT+++:::6.00'

**2. Exemption from VAT:**

- 2.1. In case of a CODED reference: DE 5279 = (pick value from **EBL001 code list**), followed by DE 3055 = "281"

Example: TAX+7+VAT+++BF35:::281'

- 2.2. In case of a NON CODED reference: **DE 5279 = "FTXLN"**. (Referring to FTX (#48) segment at line level for textual description.)

Example: TAX+7+VAT+++FTXLN'

Which 'articles of the law' to use in case of VAT exemption?

Any appropriate reference to the article of the law, granting exemption from VAT, is valid, whether it's from a national (e.g. **EBL001 code list**) or a European Directive.

However, tax analysts recommend to mention the appropriate article from the European Directive (2006/112/EC), rather than the national Directive.

For now, an article from the European Directive can only be mentioned in free text (#48). Nevertheless, GS1 and CEN are currently updating a CEN codelist.

Dependency notes :

- **DE 3055**: This DE is only used when DE 5279 contains a code from the **EBL001 code list**.
- **DE 5305**: This DE is only used in case of **Reverse Charge**. (Cf. KB1 Art. 20, Art. 20bis and Art. 20ter).

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length

MOA		C516	6345	Currency identification code	N				AN	1>3
MOA		C516	6343	Currency type code qualifier	N				AN	1>3
MOA		C516	4405	Monetary amount type code qualifier	N				AN	1>3

This segment is used to indicate the taxable amount upon which the VAT rate will be applied.

Segment notes:

(Cf. rules 27 and 28)

This segment can only be used if the preceding TAX segment (#76) of Segment Group 44 is used.

Dependency notes:

- **DE 5025:**
  - Code value '23' can only be used if DE 5463 of the preceding ALC segment (#69) has code value 'C'.
  - Code value '204' can only be used if DE 5463 of the preceding ALC segment (#69) has code value 'A'.

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
81	UNS			Section control	1	M				
	UNS		0081	Section identification	1	R	S	= Detail/summary section separation	A	1

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
<b>SG50 MOA-SG51</b>										
<b>83 MOA</b>										
<b>Monetary amount</b>										
								100		
								1 M		
MOA	C516			<b>Monetary amount</b>		R				
		C516	5025	Monetary amount type code qualifier	D R R D D R D D		9 = Amount payable (=77-113) 77 = Invoice amount (=79+150) 79 = Total line items amount 113 = Prepaid amount 129 = Total amount subject to payment discount 150 = Value added tax 176 = Message total duty/tax/fee amount 496 = Total returnable packages deposit amount		AN	1>3
MOA	C516	5004		Monetary amount	R		<..>	EANCOM recommends 4 decimal digits for control values.	N	1>35
MOA	C516	6345		Currency identification code	D	EUR			AN	1>3
MOA	C516	6343		Currency type code qualifier	D		10E = Currency for value added tax purposes (GS1 Temporary code)		AN	1>3
MOA	C516	4405		Monetary amount type code qualifier	N				AN	1>3

This segment is used to detail **total monetary values** (and prepaid amounts) due for the entire invoice.

#### Segment notes:

It is worth pointing out that the Belgian VAT Administration does not demand the invoice totals which are detailed here, except for the total VAT amount (MOA+150).

#### Dependency notes:

- **DE 5025:** \* mention 9 and 113 in case a prepaid amount is applied.  
 \* mention 129 in case a payment discount (= conditional allowance) is applied.  
 \* mention 496 in case of RTI/assets and/or consumer empties. This is the saldo of "outgoing - incoming" RTI and/or consumer empties.  
**attention:** negative invoices are not allowed! In case the amount of deductible consumer empties/RTIs is higher than the amount of chargeable consumer empties/RTIs + trade items, the returned consumer empties should be processed via a seperate credit note.
- \* mention 176 if the second DE 6347 "Currency usage code qualifier" of the CUX segment contains the value "3" and the second DE 6343 "Currency type code qualifier value "10E". In that case DE 6343 of this MOA segment should contain value "10E" and DE 6345 "EUR". Amounts in any currency may appear on an invoice, but the VAT amount should also be expressed in national currency of the EU Member State.  
 example: MOA+176:999.99:EUR:10E'  
 (The value of MOA+176 will often be 0, since invoices with foreign currencies are often related to cross-border transactions that are not subject to VAT  
 MOA+150 will be 0 as well in that case.)

- **DE 6343 & DE 6345:** only use when DE 5025 contains value 176

Segm.#	Segm.	Composite DE	DE	Data Element (DE) Name	MaxUse	Belgilux	Value	Meaning	Type	Length
					100					
					10					
					5	C

<b>SG52 TAX-MOA</b>					10					
. / ..	86	TAX		Duty/tax/fee details		1 C				

Segment notes:  
It is mandatory to mention the VAT rate (or exemption), except when the invoice/credit note only mentions RTI/assets and/or consumer empties, as they are not part of the taxable amount.

How to use **VAT indication** on footer level:

- 1. VAT is due (= NO exemption):**
  - VAT rate in **DE 5278** (C243);
  - corresponding amount in following **MOA** segment (#87).
Example: TAX+7+VAT+++:::6.00'
- 2. Exemption from VAT:**
  - 2.1 In case all tax exempts on line level are the same and
    - 2.1.1. a CODED reference has been used; DE 5279 = (code from [EBL001 code list](#)), followed by DE 3055 = "281"
    - 2.1.2. a NON CODED reference has been used; **DE 5279** = "[FTXLN](#)" and/or "[FTXHD](#)"  
(Referring to all FTX (#48) segments at line level for textual description and/or FTX (#6) at header level.)
  - 2.2 In case multiple (different) tax exempts occur, a general code value can be used; **DE 5305** = "E" (exempt from tax)  
Example: TAX+7+VAT++++E'

Which 'articles of the law' to use in case of VAT exemption?  
Any appropriate reference to the article of the law, granting exemption from VAT, is valid, whether it's from a national (e.g. [EBL001 code list](#)) or a European Directive. However, tax analysts recommend to mention the appropriate article from the European Directive (2006/112/EC), rather than the national Directive. For now, an article from the European Directive can only be mentioned in free text (#6 and/or #48). Nevertheless, GS1 and CEN are currently updating a CEN codelist.

Dependency notes:

  - **DE 3055:** This DE is only used when **DE 5279** contains a code from the [EBL001 Code list](#).
  - **DE 5305:** This DE is only used in case of **Reverse Charge**. (Cf. KB1 Art. 20, Art. 20bis and Art. 20ter.)

This segment is used to indicate any special conditions applicable to the allowances or charges at summary level.

Segment notes :

It is worth pointing out that the Belgian VAT Administration does not demand the invoice totals for charges/allowances which are detailed here with the combination of the ALC (#88) and MOA segment (#90).

Dependency notes:

Mention **DE 3055** = 281 when DE 7161 contains a code from the **EBL001 code list**.

**Annex NL - Mapping rules for KB 1 Art.5**

## TER INFORMATIE

**Koninklijk Besluit nr. 1 met betrekking tot de regeling voor de voldoening van de belasting over de toegevoegde waarde.**

**KB 1/ART.5**

**De tekst van KB 1/Art.5 werd vervangen met ingang van 01.01.2013 (Art. 8, KB 19.12.2012, B.S. 31.12.2012, Ed. 1))**

**Bron: Fisconetplus**

§ 1. De factuur **(1)** en het in artikel 2 bedoeld stuk vermelden :

1° de datum waarop ze respectievelijk worden uitgereikt of opgesteld **(2)** en een opeenvolgend nummer, volgens één of meer reeksen, dat deze stukken op eenduidige wijze identificeert, waaronder ze worden ingeschreven in het boek voor uitgaande facturen van de leverancier of de dienstverrichter **(3)**;

2° de naam of de maatschappelijke benaming van de leverancier van de goederen of van de dienstverrichter **(4)**, het adres van zijn administratieve of maatschappelijke zetel **(5)**, en zijn in artikel 50 van het Wetboek bedoeld btw-identificatienummer **(6)**;

2°bis wanneer de schuldenaar de leverancier van de goederen of de dienstverrichter is die niet in België is gevestigd en:

a) hij heeft hier te lande een aansprakelijke vertegenwoordiger laten erkennen overeenkomstig artikel 55, § 1 of § 2, van het Wetboek, de identiteit en het adres van de aansprakelijke vertegenwoordiger **(8)** en de aanduiding van zijn hoedanigheid **(7)**;

b) hij wordt vertegenwoordigd door een vooraf erkende persoon overeenkomstig artikel 55, § 3, van het Wetboek, de identiteit, het adres **(8)** en het btw-identificatienummer toegekend aan die persoon **(9)** en de aanduiding van zijn hoedanigheid **(7)**;

3° de naam of de maatschappelijke benaming, het adres (**11**) en het in artikel 50 van het Wetboek bedoeld btw-identificatienummer (**12**) van de medecontractant (**10**) of, wanneer het in artikel 39bis, eerste lid, 4°, van het Wetboek bedoelde leveringen betreft, de naam of de maatschappelijke benaming, het adres (**11**) en het btw-identificatienummer dat in de lidstaat van bestemming van de goederen aan de belastingplichtige is toegekend (**12**)

3°bis wanneer de schuldenaar de medecontractant is die niet in België is gevestigd en :

a) hij heeft hier te lande een aansprakelijke vertegenwoordiger laten erkennen overeenkomstig artikel 55, § 1 of § 2, van het Wetboek, de identiteit en het adres (**14**) van de aansprakelijke vertegenwoordiger en de aanduiding van zijn hoedanigheid (**13**);

b) hij wordt vertegenwoordigd door een vooraf erkende persoon overeenkomstig artikel 55, § 3, van het Wetboek, de identiteit, het adres (**14**) en het btw-identificatienummer (**15**) toegekend aan die persoon en de aanduiding van zijn hoedanigheid (**13**);

4° a) voor de handelingen bedoeld in artikel 21, § 2 van het Wetboek, het nummer waaronder de ontvanger (**10**) voor btw-doeleinden is geïdentificeerd en waaronder hem de dienst werd verstrekt (**12**);

b) voor de handelingen bedoeld in artikel 39bis, eerste lid, 1°, van het Wetboek, het nummer waaronder de ontvanger (**10**) in een andere lidstaat voor btw-doeleinden is geïdentificeerd (**12**);

c) in geval van toepassing van het bepaalde in artikel 25ter, § 1, tweede lid, 3°, van het Wetboek, een verwijzing naar de toepassing van die bepaling (**16**) of (**16'**), het nummer waaronder de belastingplichtige voor btw-doeleinden in een andere lidstaat is geïdentificeerd en waaronder hij de intracommunautaire verwerving en de daarop aansluitende levering van goederen verricht heeft, en het nummer waaronder de bestemming van de levering voor btw-doeleinden is geïdentificeerd overeenkomstig artikel 50 van het Wetboek (**10**) (**12**);

5° de datum waarop het belastbaar feit voor de levering van de goederen (**17**) of de dienstverrichting heeft plaatsgevonden (**18**) of de datum van de ontvangst van de prijs of een deel ervan (**19**), voorzover die datum vastgesteld is en verschilt van de uitreikingsdatum van de factuur;

6° de gegevens die nodig zijn om de handeling te determineren en om het tarief van de belasting vast te stellen, inzonderheid de gebruikelijke benaming van de geleverde goederen **(20)** en van de verstrekte diensten **(20)** en hun hoeveelheid **(21, 22 en indien van toepassing 23)** alsook het voorwerp van de diensten **(20)**;

7° de in artikel 8bis, § 2, van het Wetboek opgesomde gegevens voor de leveringen van vervoermiddelen bedoeld in artikel 8bis, § 1, van het Wetboek, evenals het merk, het model, de cilinderinhoud, de motorsterkte en het chassisnummer in geval van levering van nieuwe of tweedehandse personenauto's of auto's voor dubbel gebruik en, wanneer het gaat om tweedehandse personenauto's en tweedehandse auto's voor dubbel gebruik, de datum van de eerste inverkeersstelling en, voor de werken, het wassen uitgezonderd, verricht aan motorvoertuigen, de vermelding van de nummerplaat van het voertuig; (Niet van toepassing in HO2C INVOIC).

8° voor elk tarief of elke vrijstelling, de maatstaf van heffing **(24)**, de eenheidsprijs exclusief belasting **(25) (26)**, evenals de eventuele vooruitbetalingenkortingen **(29)**, prijskortingen en -rabatten indien deze niet in de eenheidsprijs zijn begrepen **(27) (28)**;

9° de vermelding van de tarieven van de belasting **(30)** en het totaalbedrag van de te betalen of te herziene belasting **(31)**. Het totaalbedrag van de te betalen of te herziene belasting dient te worden uitgedrukt in de nationale munteenheid van de lidstaat die de toe te passen regels bepaalt voor de uitreiking van de facturen, overeenkomstig artikel 53decies, § 1, van het Wetboek; **(38)**

9°bis "Btw verlegd" in de plaats van de vermelding van de tarieven en van het totaalbedrag van de verschuldigde belasting wanneer de belasting verschuldigd is door de medecontractant; **(32)**

9°ter "Factuur uitgereikt door afnemer", wanneer de medecontractant de factuur uitreikt in naam en voor rekening van de leverancier of de dienstverrichter; **(33)**

10° de vermelding van de betreffende bepaling van de richtlijn of van de overeenkomstige nationale bepaling op grond waarvan de handeling van de belasting is vrijgesteld of enige andere vermelding dat de handeling is vrijgesteld **(34) of (34')**;

10° bis « Bijzondere regeling - reisbureaus », wanneer de bijzondere regeling voor reisbureaus wordt toegepast; (Niet van toepassing in HO2C INVOIC)

10° ter « Bijzondere regeling - gebruikte goederen », « Bijzondere regeling - kunstvoorwerpen », « Bijzondere regeling - voorwerpen voor verzamelingen of antiquiteiten », wanneer respectievelijk één van de bijzondere regelingen voor gebruikte goederen, kunstvoorwerpen, voorwerpen voor verzamelingen of antiquiteiten wordt toegepast; (Niet van toepassing in HO2C INVOIC)

11° een verwijzing naar het vroeger uitgereikte stuk of stukken indien voor dezelfde handeling meerdere facturen of stukken worden uitgereikt of opgesteld (**35**). De factuur mag de medecontractant niet debiteren voor een bedrag als belasting waarvoor hij reeds eerder werd gedebiteerd;

12° alle andere vermeldingen die worden voorgescreven ter uitvoering van het Wetboek van de belasting over de toegevoegde waarde of de ter uitvoering ervan genomen besluiten (**36**) of (**36'**).

§ 3. Bij een reeks elektronische facturen die aan dezelfde medecontractant worden overgemaakt of ter beschikking worden gesteld, hoeven de voor de verschillende facturen gelijke vermeldingen slechts één keer te worden opgenomen, voor zover voor elke factuur alle informatie toegankelijk is (**37**).

---

#### **Richtlijn 2001/115/EG van de Raad van 20 december 2001.**

**Artikel 2, Par 2, punt b): (38)** Op een factuur kunnen bedragen in willekeurig welke munteenheid voorkomen, mits het te betalen btw-bedrag is uitgedrukt in de nationale munteenheid van de lidstaat waar de goederen worden geleverd of de diensten worden verricht en daarbij gebruik wordt gemaakt van het wisselkoersmechanisme bedoeld in artikel 11, onderdeel C, punt 2. vereist is.
