4.3 Attributes to be completed on pallet level 97

5. Attachments..... 98

5.1 Attachment 1 – Microbiological information 98

1. Purpose of this user manual

This user manual is **complementary to the documentation made available by GS1 Belgium & Luxembourg in its My Product Manager knowledge centre**, see info on [this page](#). This user manual must be used for all products for which **Colruyt Group** needs **additional information**, i.e. our **Private Label products, national brand products that undergo processing by Colruyt Group** (e.g. cutting or baking of the products) **and potatoes, fruit, and vegetables** (including e.g. unpacked nuts and dried fruit, etc.). In it, we indicate the additional information required for these products or highlight certain fields that must also be filled in by default for other types of products.

If you would like more information on how to submit **Eco-score** related product information, you can consult the specific GS1 user guide [here](#).

The **mandatory attributes** to be filled in are indicated by ‘*’. The other attributes may be mandatory depending on the product group to which your product belongs.

If, after reading through this user manual, you still have questions about:

- the details of the fields to be completed → Get in touch with your contact at Colruyt Group’s Quality Department
- validation errors, general operation of MPM, publication, etc. → Contact GS1 at support@gs1belu.org

We expect a **product sheet to be created for each level of the logistics hierarchy** (e.g., consumer packaging, outer packaging, and pallet), with both label information and B2B information in the consumer unit, and only B2B information in the logistics units. The attributes to be filled in each product sheet can be identified by the symbols next to the attribute names or based on [these lists](#).

2. Product identification

Under the ‘Product identification’ section, you must not enter any additional specific information in relation to the information provided in the GS1 [training video](#).

IS IT A CONSUMER UNIT/FOODSERVICE ITEM?*

Select ‘True’ if you are filling in the sheet for the ‘Base unit’ or the ‘Inner pack’ (filled in at ‘Product level’ visible slightly lower in the above image), this concerns products that can be scanned at the checkout or that will be reprocessed by Colruyt Group.

IN WHICH COUNTRIES WILL THE PRODUCT BE SOLD?*

Select Belgium as your product will be sold in the Belgian target market by Colruyt Group. If your product will only be sold in our Luxembourg stores, select Luxembourg.

PRODUCT CLASSIFICATION CODE*

Enter the correct GPC (global product classification) code under which the product can be subdivided. To do so, click ‘Select GPC’ and the following screen appears:

Global Product Classification (GPC)

1. Choose a main category for your product
2. Keep expanding the category tree until you find a selectable GPC code
3. Select a GPC code and click on the save button

Enter search value

<input type="radio"/> Food/Beverage	50000000
<input type="radio"/> Tobacco/Cannabis	12000000
<input type="radio"/> Beauty/Personal Care/Hygiene	53000000
<input type="radio"/> Cleaning/Hygiene Products	47000000
<input type="radio"/> Footwear	63000000
<input type="radio"/> Healthcare	51000000
<input type="radio"/> Kitchenware and Tableware	73000000

<input type="radio"/> Fruit - Unprepared/Unprocessed (Frozen) ⓘ	10000002

BRAND OWNER GLN (GLOBAL LOCATION NUMBER)*

Enter GLN 5400141000009 for Colruyt Group for Private Label products. For national brand products that Colruyt Group processes internally, you need to enter your GLN.

BRAND OWNER NAME*

For Private Label products, enter 'Colruyt Group'.

PRODUCT LEVEL?*

Enter the correct level for which you are completing the sheet in the logistics hierarchy.

3. Product data

The following sections discuss all the attributes/fields that need to be filled in. You can follow the order of the user manual and open the sections one by one, or you can search for a specific attribute by name using the search function at the top right of the screen.

3.1 Section 'Product Descriptions'

3.1.1 Product description

LANGUAGE - PRODUCT DESCRIPTION*

Base unit

Enter a clear description of the product at least in the required languages (e.g. Dutch, French, English and German for the target market/sales in Belgium).

When specifying quantities or weights, take into account the level for which you are completing a sheet in the logistics hierarchy (e.g. for the sheet of a 4-piece pack, enter 'x4' or '4 pieces' to distinguish it from the base sheet in terms of description).

3.1.2 Other product descriptions fields (not in tables)

BRAND*

Enter your product's correct brand. You add brands by first clicking 'Create new brand' to the right of the field and then selecting it in this field. The following table provides an overview of all Colruyt Group's Private Label brands.

If your product has no brand, create the brand 'unbranded'.

Private Labels (except for wine)		
Bio-Planet	Culino	Hiron
Boni Selection	Econom	Marie Galante
Cara	Everyday	Okay
Colruyt Savoir-faire	Excellent	Porto Amuro
Colruyt Vakmanschap	Graindor	Rose Mary
Cru	Highcool	Spar
Wine brands		
Bisson	Kalamundi	Les Éperviers
Blygedacht	La Croix Fourget	Les Hauts Rocs
Cagnard	La Fanfinette	Les Trois Églises
Comte de Bredimus	La Maréchaude	Les Vanniers
Comtesses du Val	La Pastorale	Lumière du Sud
Corazon	Las Laderas	Marquis de Villon
Cordillera	Lazy Bear	Moulin De Montagnac
Cuvée Grand Prix	Le Cavalier-Roi	Parasol
Cuvée Sartre	Le Fort du Bois	Plaisir du Sud
Duc De Lerme	Le Haut-Médoc	Saviu
Estuario	Le Menaudat	Soubirac
Hage	Le Peyrat	Terrefort
Haspenhof	Le Plus de Luzanet	Vernon
Haut-Tannet	Le Pré Clos	Veuve des Lys
Hemelshof	Le Va et Vin	Vino Sentada
Il Gran Giardino	Les Bécasses	Vinocol
Jacques Cartier	Les Douves	Waratah

SUB BRAND

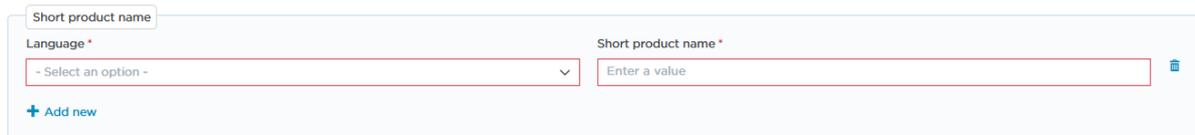

Enter the correct sub brand if applicable to the product. The following sub brands are only possible for the 'Boni Selection' brand:

- Boni Selection Bio
- Boni Selection Eco
- Boni Plan't

3.1.3 Short product name*

Click 'Add new' to access the following screen.

LANGUAGE – SHORT PRODUCT NAME*

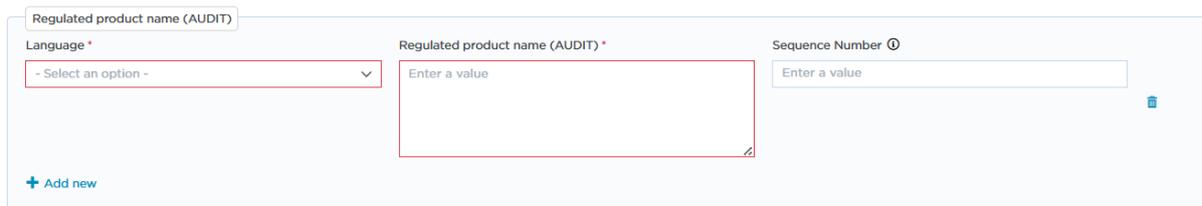

You have the option of entering a short name for the product in at least Dutch, French or English.

When specifying quantities or weights, take into account the level for which you are completing a sheet in the logistics hierarchy (e.g. for the sheet of a 4-piece pack, enter 'x4' or '4 pieces' to distinguish it from the base sheet in terms of description).

3.1.4 Regulated product name

Click 'Add new' to access the following screen.

LANGUAGE – REGULATED PRODUCT NAME

Enter the regulated product name required for food, chemist and pet food products. This name must comply with the requirements laid down in EU labelling regulations (1169/2011) to provide non-misleading and useful information about the product. Always enter it at least in Dutch and French. If you only have one of the two translations, you can e.g. use Google Translate to enter the regulated name in the 2nd language as well.

Only enter the regulated name in this field. Other mandatory information that must be included on the packaging must be entered in other fields. For example, in the 'Provenance statement' field in the ['Origin' section](#) or 'Additional legal product information' in the ['Statements/Claims' section](#).

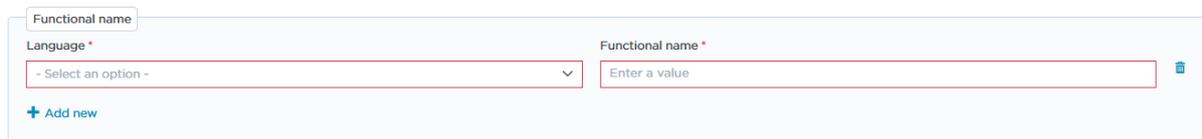

Specific points of attention:

- **Meat products:** add ‘cooked’ - ‘smoked’ to the regulated product name
- **Fish products:** add ‘cooked’ - ‘smoked’ - ‘raw’ - ‘boneless’ - ‘peeled’ - ‘guttled’ to the regulated product name
- **Dairy products:** add ‘contains salt’ or ‘does not contain salt’ (butter) - the variety (Gouda, etc.) and type of cheese in the regulated product name
- **Fruit and vegetable products:** add ‘seedless’ - ‘pitted’ - ‘RTE avocado’ - ‘tree-ripened mango’ to the regulated product name

If you add multiple regulated produce names in the same language, you must also fill in the sequence number. Ensure that the sequence number of the regulated product name is the same for both the Dutch and French translations.

3.1.5 Functional name*

Click ‘Add new’ to access the following screen.

LANGUAGE – FUNCTIONAL NAME*

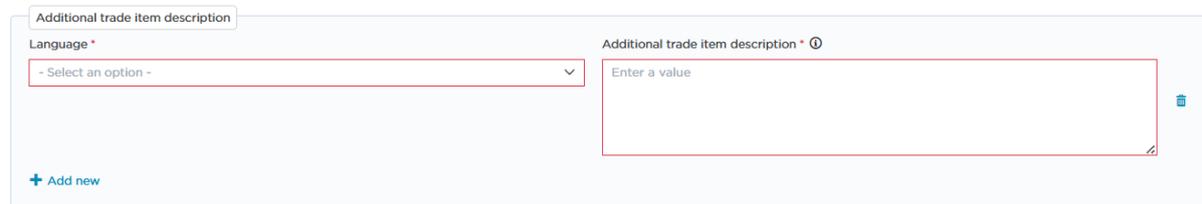

Enter a functional name of the product in at least Dutch, French or English that captures the essence of the product for consumers.

Examples: Soup, Shampoo, Chewing gum, etc.

3.1.6 Additional trade item description

Click ‘Add new’ to access the following screen.

LANGUAGE – ADDITIONAL TRADE ITEM DESCRIPTION

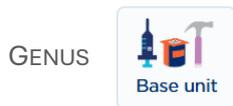

You have the option of providing an additional description of the product.

3.1.7 Taxonomy

This section should only be filled in for potatoes, fruit and vegetables, among others, and the selected GPC code determines whether or not it is visible.

Click 'Add new' to access the following screen.

The screenshot shows a form titled 'Taxonomy'. It contains two input fields: 'Genus' and 'Species', both with a placeholder 'Enter a value'. Below the 'Genus' field is a blue '+ Add new' button. There is also a small trash icon to the right of the 'Species' field.

Enter the Latin name of the genus of the product here.

Enter the Latin name of the type of product, which comes directly below the genus.

3.2 Section 'Identification'

The screenshot shows the 'Identification' form. It includes the following fields and controls:

- 'Identification code of variable product' with a placeholder 'Enter a value'.
- 'Additional product identification' section with a '+ Add new' button (highlighted in green).
- 'Is Trade Item A Base Unit' with 'True' and 'False' radio buttons (highlighted in green).
- 'Is trade item a despatch unit' with 'True' and 'False' radio buttons.
- 'Is trade item an orderable unit' with 'True' and 'False' radio buttons.
- 'Is trade item a variable unit' with 'True', 'False', and 'clear' buttons (highlighted in green).
- 'Is trade item a service' with 'True' and 'False' radio buttons.
- 'Seasonal product indicator' dropdown menu with '- Select an option -' (highlighted in green).
- 'Device Model' with a placeholder 'Enter a value'.
- 'Loose or Pre-Packed Code' dropdown menu with '- Select an option -' (highlighted in green).

ADDITIONAL PRODUCT IDENTIFICATION

You have the option of providing an internal reference for the product.

ADDITIONAL PRODUCT IDENTIFICATION TYPE CODE

Select SUPPLIER_ASSIGNED if you are including an internal reference for the product.

3.2.2 Other identification fields (not in tables)

IS TRADE ITEM A BASE UNIT*

Select 'True' if you are filling in the sheet for the 'Base unit' (filled in at 'Product level' under '[Product identification](#)'), select 'False' if you are filling in a sheet of a higher packaging hierarchy.

IS TRADE ITEM A VARIABLE UNIT *

Select 'True' if the weight of the product is variable and no fixed weight is specified on the packaging. If not variable, select 'False'.

SEASONAL PRODUCT INDICATOR*

Select 'True' if the product is only available during specific periods (e.g.: seasonal). If the exact start and end dates during which the product is available are known, enter them in the ['Timings' section](#) in the 'Consumer first availability date time' and 'End availability date time' fields. Other season-related attributes can be found under the ['Colruyt Private Label' section](#).

LOOSE OR PRE-PACKED CODE

If the product has a variable weight, indicate whether it is loose or pre-packed.

HAS BATCHNUMBER?*

Indicate whether there is a batch/lot number on the packaging.

BATCH NUMBER LOCATION (COLRUYT PL)

If there is a batch/lot number on the packaging, indicate the location of the number on the packaging/product. E.g. on the front at the bottom on the left, on the lid, on the cap, on the underside, etc.

BATCH NUMBER FORMAT (COLRUYT PL)

If there is a batch/lot number on the packaging, specify the format in which the number is printed on the packaging/product. E.g. '0123abc00' or 'L01234', etc.

BRAND DISTRIBUTION TRADE ITEM TYPE CODE *

Identify the product as one for which Colruyt Group requires additional information by selecting '[PRIVATE LABEL]'.

DISPLAY UNIT INDICATOR

Select 'True' if this is the sheet for a display unit or leave this attribute blank if it is not a display.

DISPLAY TYPE CODE

Select the correct type of display if you selected the value 'True' above under 'Display unit indicator'.

NET CONTENT – UNIT OF MEASURE*

Enter the correct net weight, volume or content in pieces of the product as stated on the physical packaging.

3.3.2 Net content statement

Click 'Add new' to access the following screen.

LANGUAGE – NET CONTENT STATEMENT

For pre-packaged products containing multiple units and complying with 76/211/EEC (E_MARK), indicate in Dutch, French or English to which unit the guarantee of accuracy and reliability of the declared content applies (= E-mark location). To the single content or combined content?

Example: 6 pack of 750 g for which a guarantee applies to the individual vs the composite unit:

- **Language:** Select the language (NL, FR or EN) in which the 'Net content statement' has been entered
- **Net content statement**
 - Guarantee applicable to the individual unit → 6*125 g
 - Guarantee applicable to the composite unit → (6*125 g)e

Specifically for bake-off products, provide the weight for both the frozen product and the baked or thawed product.

3.3.3 Other content fields (not in tables)

NUMBER OF SERVINGS PER PACKAGE

If applicable, provide the number of servings the package contains.

DRAINED WEIGHT - UNIT OF MEASURE

Enter the drained weight, with the correct measurement unit, if applicable to the product.

PERCENTAGE OF ALCOHOL BY VOLUME

For products containing alcohol, enter the correct alcohol percentage.

VINTAGE

For wine, enter the correct vintage.

DEGREE OF ORIGINAL WORT

For beer, enter the degree of the original wort (sugar, water, yeast, barley, hops, etc.) used to allocate the different types of beer to their respective tax group/beer excise duty.

3.4.1 Other dimensions fields (not in tables)

For more information about which dimension to fill in and where, you can watch [this video](#).

HEIGHT – UNIT OF MEASURE*

Enter the correct vertical dimension for the product; from the lowest to the highest point.

DEPTH – UNIT OF MEASURE*

Enter the correct dimension for the product; from the foremost to the rearmost point.

WIDTH – UNIT OF MEASURE*

Enter the correct horizontal dimension for the product; from the point at the extreme left to the point at the extreme right.

NET WEIGHT – UNIT OF MEASURE*

Enter the net weight (weight of the product without its packaging), together with the correct measurement unit. For example, for outer boxes, multiply the net weight of the product (base) by the number of pieces in the outer box.

GROSS WEIGHT – UNIT OF MEASURE*

Enter the gross weight (weight of the product with its packaging), along with the correct measurement unit. If you are filling in the pallet sheet, the weight of the pallet must be included.

3.4.2 Product grade

[+ Add new entry](#)

[+ Add new](#)

End availability date time ⓘ

3.6.1 Other timings fields - 1 (not in tables)

START AVAILABILITY DATE TIME*

If the exact start date when the product is available is known, enter the date in this field. If not known enter the date on which you are filling in the product sheet.

3.6.2 Trade item lifespan per target market

Click 'Add new entry' to access the following screen.

Trade item lifespan per target market

Default

Target markets

- Select some options -

Lifespan

Minimum Days of Shelf Life from Production (in days)

Enter a value

Minimum days of shelf life at arrival (in days)

Enter a value

Opened trade item lifespan (in days)

Enter a value

Enter the correct shelf life information for each country in which the product will be sold (countries to be entered in the ‘In which countries will the product be sold?’ field) in [‘Product identification’](#)).

TARGET MARKETS 

Select the target market for which you wish to enter the shelf life information.

MINIMUM DAYS OF SHELF LIFE FROM PRODUCTION (IN DAYS) 

If it concerns a product subject to a mandatory shelf life specification, indicate the number of days the product’s life is guaranteed for the selected target market after production.

MINIMUM DAYS OF SHELF LIFE AT ARRIVAL (IN DAYS) 

If it concerns a product subject to a mandatory shelf life specification, indicate the number of days the product’s life is guaranteed for the selected target market after receipt.

OPENED TRADE ITEM LIFESPAN (IN DAYS) 

If it concerns a product subject to a mandatory shelf life specification, indicate the number of days the product’s life is guaranteed for the selected target market after opening.

Not applicable to frozen products, but applicable to chilled products, and those in tins and jars.

3.6.3 Date on packaging

Click 'Add new' to access the following screen.

PACKAGING DATE TYPE CODE

Indicate which type of dates will be listed on the packaging. E.g. Best before date, Use by date, Packaging date, etc.

PACKAGING DATE FORMAT (COLRUYT PL)

Specify the format in which the selected type of date will be listed on the package.

E.g. DD/MM/YYYY (e.g. 16/01/2026)

PACKAGING DATE LOCATION (COLRUYT PL)

Specify where the selected type of date will be added to the packaging.

E.g. See cap, see lid, see underside, etc.

3.6.4 Other timings fields - 2 (not in tables)

END AVAILABILITY DATE TIME*

If the exact end date when the product ceases to be available is known, enter the date in this field.

3.7 Section 'Packaging'

See also this [link](#) for more information about entering packaging information in My Product Manager. Via this page, among other things, you can click through to an [online video training session](#), focusing specifically on entering packaging attributes.

Packaging information is also relevant for calculating the Eco-score. The specific user manual on this subject can be accessed via [this link](#).

Below you can find the specific attributes that Colruyt Group needs to fill in.

3.7.1 Packaging Information

NUTRITIONAL PREPARATION CODE

Indicate whether the nutrients apply to the prepared or unprepared product.

- Prepared > This applies to products that still need to undergo preparation by the customer, the nutritional values will change after preparation by adding milk, water or oil
- Unprepared > This applies to 'ready-to-eat' products, even if they require further preparation, as the nutritional values remain the same after preparation

NUTRIENT BASIS QUANTITY

Enter 100 grams or 100 millilitres to indicate whether the nutritional values apply per 100 g or 100 ml.

NUTRIENT CODE – NUTRIENT VALUE PRECISION CODE – QUANTITIES

Fill in the table that appears:

- All nutrients that are added automatically:
 - Energy (ENER-) = Kilocalorie
 - Energy (ENER-) = Kilojoule
 - Fat (FAT), total fat content
 - Fatty acids, saturated (FASAT)
 - Fatty acids, monounsaturated (FAMSCIS) - if applicable
 - Fatty acids, Polyunsaturated (FAPUCIS) - if applicable
 - Carbohydrate (CHOAVL)
 - Sugars (SUGAR-)
 - Protein (PRO-)
 - Salt (SALTEQ)
- The following nutrients you still need to add via 'Add new' at the bottom on the left
 - Fibre (FIBTG)
 - Sodium (NA)
 - If applicable, also add the following:
 - Omega 3 Acids
 - Vitamins and minerals added

Enter the precision, actual value (quantity) and determination code (see below) for all the above nutrients.

DETERMINATION CODE (COLRUYT PL)

The 'Determination code' is used to determine the nutritional value and can be added by clicking the 3 dots at the top on the right, followed by clicking 'Determination code'.

[+ Add new](#)

Enter the list of ingredients that must be indicated on the packaging in line with Regulation (EU) No 1169/2011. Do this in at least one of the following languages: Dutch, French or English.

- **Allergens** must be noted in capital letters. E.g.: GLUTEN
- This information is mostly **ingredient-specific** but can/may also include **product-related** information:
 - **Single fish products** caught at sea > There is an option to list them in the ingredients list immediately after the ingredient (commercial name). Filling in these fields is mandatory in the [‘Origin’ section](#) > *Fish information*
 - Fish Scientific Name
 - Fish production method code
 - Fishing gear code
 - Catch Area Code
 - **Meat and meat products** > Add additional specifications such as ‘100 g of the product made from xxx g of meat’ (for example, relevant for salami) at the end of the ‘ingredient statement’.
 - **Jams**
 - Total amount of sugar per 100g at the end of the ‘ingredient statement’ or in ‘Additional legal product information’ in the [‘Statements/Claims’ section](#)
 - How much fruit is in the final product + how much fruit was used to make the jam (+ **prepared** with xxx g of fruit / 100 g) to be added at the end of the ‘ingredient statement’
 - Products containing **cocoa** > state the minimum % of cocoa (e.g.: at least 56% cocoa) at the end of the ‘ingredient statement’.
 - For certain products, it is desirable for marketing purposes to include not only the % of the ingredient in the final product, but also the % of the ingredient in the original recipe for processing the final product. Add this information at the end of the ‘ingredient statement’.
 - E.g. Bolognese sauce is cooked and after cooking, % of minced meat has evaporated.
X% of minced meat was used to make the product.
After the product is produced, it only contains only y% of minced meat.

Other mandatory information that must be included on the packaging must be entered in other fields. For example, in the ‘Provenance statement’ field in the [‘Origin’ section](#) or ‘Additional legal product information’ in the [‘Statements/Claims’ section](#).

3.12.2 Non-food ingredient statement

Click ‘Add new’ to access the following screen.

LANGUAGE – NON-FOOD INGREDIENT STATEMENT – SEQUENCE NUMBER

For non-food products, provide the information relating to the composition of the product, which must be specified on the packaging.

3.12.3 Ingredient information

Click 'Add new' to access the following screen.

This part is **mandatory** to fill in for all non-food products that are a mixture, petfood and all food products.

Ingredient Information:

General Ingredient Information:

Additional Ingredient Information ⓘ	+ Add new

[+ Add new](#)

Add all ingredients and sub-ingredients present in the product and that must be specified on the packaging in accordance with Regulation (EU) No 1169/2011 on the provision of food information to consumers, and fill in the fields that appear. Do this in at least one language (Dutch, French or English) and provide the information consistently in the same language. Sub-ingredients can only be added once the main ingredient has been entered.

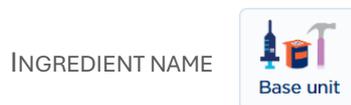

3.12.3.1 *Other ingredient information fields - 1 (not in tables)*

List the order of ingredients according to the percentage contained in the product. This is the same order as in the list of ingredients on the packaging and in the ‘ingredient statement’ field

- The main ingredient with the highest % is assigned serial number 01. The main ingredient with the second highest % is assigned serial number 02, and so on.
- The sub-ingredient with the highest % is assigned serial number 0x.01. The sub-ingredient with the second highest % is assigned serial number 0x.02, and so on. Where x is the serial number of the main ingredient to which the sub-ingredient belongs.

3.12.3.2 *Ingredient Name*

Click ‘Add new’ to access the following screen.

Ingredient Name ⓘ	- Select an option -	- Select an option -	+ 
-------------------	----------------------	----------------------	---

Enter the name of the ingredient as it should appear in the list of ingredients on the packaging and in the ‘ingredient statement’ field (e.g.: Tomato). Type the name of the ingredient or select (if fish) the correct ingredient by clicking the arrow to the right of the field.

- List the allergens in capital letters (e.g.: GLUTEN)
- For all fish ingredients, in addition to the commercial name enter the corresponding scientific name in brackets. Even when it does not need to be mentioned on the packaging or in the list of ingredients (e.g.: Mackerel (Scomber Scombrus)).
- For cosmetics, always mention the ingredient’s official INCI name

3.12.3.3 *Other ingredient information fields - 2 (not in tables)*

Specify, for the purpose of the functional class of the food additives (‘E numbers’) used in the product. This class is determined based on the technological function this additive performs in the foodstuff. The complete list of functional classes can be found in Attachment I of Regulation (EC) No 1333/2008.

Do this by selecting the correct purpose from the list in the field, which can be found by clicking the arrow to the right of the field, or, if you cannot find the correct value, manually type the purpose in the field. The values ‘ADDED’ or ‘NATURAL’ may not be selected here.

Example: E3113: antioxidant, colouring agent, and so on.

INGREDIENT CONTENT PERCENTAGE 

Enter the % of the (sub-)ingredient contained in the total product (E.g.: 50). You can enter up to 2 decimal places here, which means you cannot enter a number lower than 0.01%. If the (sub-)ingredient is present to a very limited extent (e.g. herb layer on cheese), you may also enter the herbs together as a ‘herb mixture’.

GRAPE VARIETY CODE 

Indicate the grape variety used to produce this wine, e.g. Merlot.

3.12.3.4 *Ingredient origin*

Click ‘Add new’ to access the following screen.

INGREDIENT COUNTRY OF ORIGIN CODE 

Select the (sub-)ingredient’s country of origin from the list of codes (e.g. Spain).

If the origin of the ingredient is variable and

- NO information on the specific % is available for each place of origin, please list all relevant places of origin.
Example: A product made of 80% tomatoes of which an unknown % are from Morocco and an unknown % from Belgium
 - Ingredient Sequence: 01
 - Ingredient name: Tomato
 - Ingredient content percentage: 80
 - Ingredient country of origin code: Morocco, Belgium
- If there IS information available about the specific % for each place of origin, add an ingredient for each country of origin with detailed information.

Example: Product with 80% tomatoes of which 60% are from Morocco and 20% from Belgium

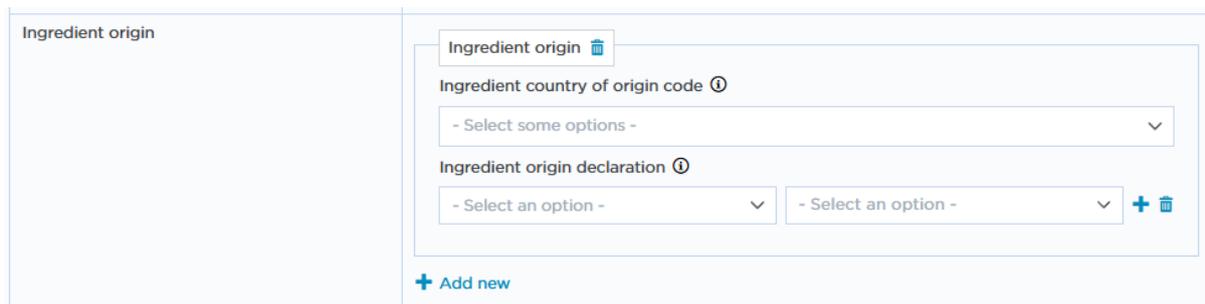

- Ingredient information 1
 - Ingredient Sequence: 01.01
 - Ingredient name: Tomato
 - Ingredient content percentage: 60
 - Ingredient country of origin code: Morocco
- Ingredient information 2
 - Ingredient Sequence: 01.02
 - Ingredient name: Tomatoes
 - Ingredient content percentage: 20
 - Ingredient country of origin code: Belgium

Note: DO NOT use this field to indicate the origin of fish ingredients caught at sea (MARINE_FISHERY). For this purpose, use 'Ingredient origin declaration' (see below).

3.12.3.4.1 Ingredient origin declaration

Only to be completed for fish ingredients caught at sea.

Click 'Add new' to access the following screen.

INGREDIENT ORIGIN DECLARATION

Specify the origin of the fish ingredient caught at sea

- Select the 'FAO-fishing area' and the corresponding FOA code in brackets, preceded by the words 'Caught in' (e.g. Caught in the Arctic Ocean (18))
- Select the 'FAO-fishing method' and the corresponding FAO code (in brackets preceded by the words 'Caught using' (e.g. Caught with tow lines - dredges operated from a ship (DRB))

Note: For single fish products caught at sea, this information must also be entered at product level via the fields (See '[Origin](#)' section > Fish information):

- Fishing gear code
- Catch Area Code

3.12.3.5 Organic claim

Click 'Add new' to access the following screen.

Colruyt Private Label:

Organic claim ⓘ	- Select an option -	+ 🗑️
-----------------	----------------------	------

ORGANIC CLAIM

For organic products, indicate the % of organic origin at ingredient level. A minimum % of organic agricultural ingredients must originate from the EU.

When an organic claim is made at product level, you must also indicate for each ingredient whether the ingredient is organic or not. If the ingredient is organic, select '100% Organic. If the ingredient is not organic, select 'Not organic'.

3.12.3.6 Other ingredient information fields - 3 (not in tables)

INGREDIENT ACCREDITATION CODE

Select the quality mark or label with which the ingredient in question complies.

- If the ingredient was not accredited for any of the possible labels select 'NOT_ACCREDITED'.
- If the ingredient-specific accreditation does not appear in the list of codes enter the correct accreditation in the 'Additional Ingredient Information (Colruyt PL)'

If applicable, enter the quality marks labels for:

- **Fish** > MSC, ASC, Naturland, ILVO assessment
- **Meat** > Belbeef, Belplume, Bepork, Codiplan plus parkkonijn
- **Etc.**

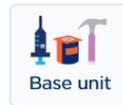

Note: Only use this field for labels that apply to specific ingredients. If the label applies to the product as a whole, you need to enter it in the 'Third party accreditation symbol on product package code' field in the ['Statements/claims' section](#).

INGREDIËNT SOURCE

Select the right source for the ingredient for which the source can be animal, plant or microbial.

ADDITIONAL INGREDIENT INFORMATION

Click 'Add new' to access the following screen.

Additional Ingredient Information ⓘ	- Select an option -	Enter a value
-------------------------------------	----------------------	---------------

Here, enter additional ingredient information that is mandatory for inclusion on the packaging or required by Colruyt Group, if no specific field is provided for this or if a specific code (e.g. sustainability label) is missing from the lists provided for this purpose. Complete this field in Dutch, French or English.

Mandatory information to be provided in this field:

- **Frozen fish & molluscs and shellfish** > Glazing water
E.g. Glazing water: 0 % in the finished product - x% in the recipe
- **Crab** > % of crab meat and % of crab legs
- **Products with egg ingredients** > Where do they come from: eggs from organic hens, from free-range hens, from totally free-range hens or from hens in enriched cages
- **Ingredient with specific accreditation** that do not appear in the list of codes of field 'Ingredient Accreditation Code (Colruyt PL)' > Correct accreditation
- **Oils and fats** > Cold-pressed / refined / non-hydrogenated / partially hydrogenated / hydrogenated
- **Cosmetics & detergents** > CAS no. to be specified
- Specific ingredient to which a preservation technique was applied. If a preservation technique was applied to the product as a whole, this must be entered under 'Code preservation technique' in the '[Colruyt private label](#)' section.
E.g. For fish: SINGLE_FROZEN / SEA_FROZEN/DOUBLE_FROZEN / SEA_FROZEN

3.13 Section 'Instructions for consumer'

3.13.1 Usage instructions

Click 'Add new' to access the following screen.

For a single fish product caught at sea, select the 'FAO-fishing area' and the corresponding FOA code in brackets, preceded by the words 'Caught in' (e.g. Caught in the Arctic Ocean)

FISH STORAGE STATE CODE 

Specify whether or not the fish was previously frozen.

3.14.4 Organic claim

Click 'Add new' to access the following screen.

3.14.4.1 Other organic claim fields (not in tables)

Indicate whether the product is fully or partially (only some of the ingredients) organic.

Only the following codes may be selected in this field:

- 2 = Organic → according to European legislation
- 4 = Some organic ingredients (less than 70% by weight) → a certain % is organic
- 5 = Not organic
- 6 = In conversion → only possible for unprocessed or single-ingredient plant-based products

Note: Only the '[Organic]' value is allowed for the 'Organic level code' attribute when the product complies with EU regulation 2018/848 on organic production and labelling of organic products and the EU organic logo may be displayed on the packaging. This value should only be selected if, for EU processed food, at least 95% of the product's agricultural ingredients are organic by weight, or if 100% of the product is organic if it concerns fresh produce such as fruit and vegetables, meat, fish, and eggs, etc.

3.14.4.2 Organic certification

Click 'Add new' to access the following screen.

ORGANIC CERTIFICATION IDENTIFICATION

Enter the number issued to confirm that something has obtained organic certification.

3.14.5 Other origin fields - 2 (not in tables)

PLACE OF FARMING OF ORGANIC PRODUCT

For organic products, enter the origin of the organic agricultural raw materials here, as indicated near the European organic logo that may be included on the packaging.

AB-CDE-999

LANGUAGE – CLAIM DESCRIPTION

Include any non-regulatory claims that may be displayed on the packaging.

3.15.1.3 *Other Claims and Product information details (not in tables)*

SKIN PRODUCT FUNCTION OR TREATMENT

Only applicable to cosmetic products.

Indicates the descriptive term, based on product promotion, labeling, or packaging, used by the product manufacturer to specify the various functions or treatment possibilities of the skin product or moisturizing product.

TARGET SKIN TYPE

Only applicable to cosmetic products.

Indicates the descriptive term, based on product promotion, labeling, or packaging, used by the product manufacturer to identify the skin type for which the product is intended.

3.15.2 Additional legal product information

Click 'Add new' to access the following screen.

LANGUAGE - ADDITIONAL LEGAL PRODUCT INFORMATION

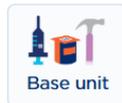

Enter all the legally required product information IF no other specific field (e.g. regulated name, declaration of origin, etc.) is provided OR if the additional legally required information cannot be found in the list of codes in the field with the same name 'Additional Legal Product Information Code' in the ['Colruyt Private Label' section](#).

3.15.3 Regulatory information

Please indicate which legislation applies to your product and whether the products comply with the rules established in this legislation.

Click 'Add new entry' to access the following screen.

TARGET MARKETS

Select the country for which you wish to enter your information.

Click 'Add new' again to access the following screen.

3.15.3.1 *Other information about regulatory information fields - 1 (not in tables)*

REGULATION TYPE

Select the regulations that apply to the product.

- **E_MARK** = For pre-packaged products covered by European Directive 76/211/EEC (Directive on the approximation of the laws of the Member States relating to the making-up by weight or by volume of certain pre-packaged products). Select this value for all food and non-food products and indicate under 'Regulation compliance indicator' below whether the product complies with these regulations.
- **INTENDED_TO_COME_INTO_CONTACT_WITH_FOOD** = For products covered by European Regulation 1935/2004 (Regulation on materials and articles intended to come into contact with food). Select this value for all food and non-food items that may come into contact with food, and indicate under 'Regulation compliance indicator' below whether the product complies with these regulations.
- **ANIMAL_ID_HEALTH_MARK** = For products covered by EU Regulation 853/2004 (Regulation laying down specific hygiene rules for food of animal origin). For this regulation, always enter the accreditation number under 'Regulatory permit identification'. Select this value for all animal food products covered by this accreditation

and indicate under ‘Regulation compliance indicator’ below whether the product complies with this regulation.

- **Etc.**

3.15.3.2 Permit Identification

Click ‘Add new’ to access the following screen.

REGULATORY PERMIT IDENTIFICATION

Enter the accreditation number of the company that will be listed on the packaging.

Please see the example of an accreditation number below > Identification of the legal permit = 40157

Note: EU Regulation 853/2004 (ANIMAL_ID_HEALTH_MARK) accreditation numbers of other companies involved in the product’s supply chain can be specified in the [‘Contact information’ section](#).

3.15.3.3 Other information about regulatory information fields - 2 (not in tables)

REGULATION COMPLIANCE INDICATOR

Indicate whether the product complies with the regulation selected in ‘Type verordening/richtlijn’.

- [TRUE] = Product complies with the regulation
- [FALSE] = Product does not comply with the regulation
- [NOT_APPLICABLE] = Legislation does not apply to the product

Note: We will not accept products to which a certain regulation applies but which do not comply with the regulation (‘Regulation compliance indicator = FALSE).

3.15.4 Other Statements/claims fields (not in tables)

THIRD PARTY ACCREDITATION SYMBOL ON PRODUCT PACKAGE CODE

Here you enter the accreditations (sustainability marks and labels) that relate to the product and may be included on the packaging.

Here are some examples:

- MSC certification for fish = MARINE_STEWARDSHIP_COUNCIL_LABEL
- RSPO certified palm oil = SUSTAINABLE_PALM_OIL_RSPO
- Organic product = EU_ORGANIC_FARMING
- Product with the PEFC certificate for sustainable forest management = One of the accreditations starting with '[PEFC'
- Product with the FSC certificate for sustainable forest management (FSC) = One of the accreditations starting with '[FOREST_STEWARDSHIP_COUNCIL'

If additional information can be added such as the certification number, etc., this must be done via the fields under [the 'Certification' section](#).

- For **vinegar**:
 - TARGET_pH
 - WEIGHT_DENSITY
 - TARGET_ACIDITY
 - PURE_BASE_RATIO
- For **meat**:
 - TARGET_FAT_ON_DRY_BASIS

Note: If you cannot find the correct code, enter the physiochemical information under ‘Other Characteristics’, a little lower down in this ‘Colruyt private label’ section.

3.25.2.2 *Physiochemical Characteristic Value*

PHYSIOCHEMICAL CHARACTERISTIC VALUE - UNIT OF MEASURE

Click 'Add new' to access the following screen.

Physiochemical Characteristic Value

Physiochemical Characteristic Value * ⓘ Unit of Measure * 🗑️

- Select an option - ▼

+ Add new

Enter the value and corresponding unit under 'Physiochemical Characteristic Value' and 'Unit of Measure' respectively.

Example: For olive oil with a density of 0.93 grams/cm³, enter '0.93' under 'Physiochemical Characteristic Value' and 'Gram Per Cubic Centimetre' under 'Unit of Measure'.

Note: If you cannot find the correct unit of measure, enter the physiochemical information under 'Other Characteristics', a little lower down in this 'Colruyt private label' section.

3.25.3 Microbiological Information

Click 'Add new' to access the following screen.

Microbiological Information

Microbiological Information 🗑️ Delete

Microbiological Organism Code ⓘ ▼

+ Add new

Note: See attachment 1 for more information on how these standards relate to commonly used limits (e.g. Microbiological criteria from Ghent University) + detailed example.

MICROBIOLOGICAL ORGANISM CODE

Select the microbiological organism you want to share information about.

If it is required by law, the amount of colony-forming units per 10 g or 25 g (e.g. Salmonella) instead of per 1 gram, enter the microbiological organism, the reference value, maximum value and possibly the warning value under 'Other Characteristics' a little lower down this 'Colruyt private label' section.

Note: If you cannot find the correct code enter the microorganism under 'Other Characteristics' a little lower down this 'Colruyt private label' section.

REFERENCE VALUE

Enter the typical value for acceptable quality. Under 'Unit of measure', select the value 'Colony forming Units per gram (CFU/g)'.

WARNING VALUE

Enter (if a 3-class plan applies) the limit for acceptable quality. Under 'Unit of measure', select the value 'Colony forming Units per gram (CFU/g)'.

MAXIMUM VALUE

Enter the maximum permissible amount of colony-forming units of the microbiological organism measured at the end of the shelf-life. Under 'Unit of measure', select the value 'Colony forming Units per gram (CFU/g)'.

3.25.4 Modified Atmosphere Packaging Gas Composition

Click 'Add new' to access the following screen.

Modified Atmosphere Packaging Gas Composition

Enter a value

[+ Add new](#)

MODIFIED ATMOSPHERE PACKAGING GAS COMPOSITION

If the composition of the gases in the packaging (MAP Modified Atmosphere Packaging) was modified to extend the shelf life and quality of food products, enter the gas composition and corresponding % here.

3.25.5 Other ‘Colruyt Private Label’ fields - 2 (not in tables)

PRESERVATION TECHNIQUE CODE

Select the correct preservation technique for the product.

For example

- For **dairy products** > PASTEURISATION, HIGH_TEMPERATURE_TREATED_MILK, ULTRA_HIGH_TEMPERATURE (increases the shelf life of dairy products), ATTESTED_MILK (If not heat-treated), etc.
- For **smoked fresh fish** > COLD_SMOKE_CURING or HOT_SMOKE_CURING

Note: If you cannot find the correct code, enter the preservation technique under ‘Other Characteristics’, a little lower down in this ‘Colruyt private label’ section.

IRRADIATED CODE*

If possible, indicate whether the product was irradiated ([TRUE]) or not ([FALSE]).

3.25.6 Other Characteristics

Click ‘Add new’ to access the following screen.

LANGUAGE – OTHER CHARACTERISTICS

If multiple types of information are included in this field, you should separate them by using ‘spatie#spatie’.

Example: E. coli (O157): 0 cfu/25 g # Listeria spp: 0 cfu/25gr # fat content on dry matter: 20%

Use this field

- For **all product groups** to enter product-specific properties
 - Such as the number of pieces per pack (+deviation), size/calibre (+deviation), pesticides, peroxide value, FFA, etc.
 - Specific standards/requirements (often linked to the class in the UNECE standard)
- For **sweeteners** (pills or powder based on sucralose, aspartame (such as Canderel)) to substitute the sweetness of sugar
- To specify the specific standards/requirements or additional information for
 - **Fresh fish/frozen fish:**
 - % of fat/moisture loss during shelf life
 - Smoked (dry-salted or injected)
 - Shrimps (cooked, blanched or raw, peeled, deveined, % edible)
 - Frozen raw material?
 - Weight per piece (or calibre/size)
 - Raw/cooked
 - Whole fish, portion, fillet or loin
 - Whole fish (with/without the head, with/without the guts, % edible)
 - Portion, fillet or loin (with/without the skin, with/without bones, trimming method: trim/cut)
 - **Frozen fish/shellfish:**
 - % of glazing
 - Freezing method (deep-frozen, single-frozen, double-frozen)
 - **Shellfish:**
 - Scallops with or without the coral
 - **Tinned fish**
 - Frozen raw material?
 - With/without bones
 - Weight per piece
 - Packaged raw (always for salmon with skin and bones) or precooked
 - Packaging sterilised or pasteurised
 - Tuna (% solid, chunks and flakes, single or double cleaned)
 - Mackerel (with/without the brown meat)
 - Crab (% meat and % leg, no cartilage)
 - **Meat**
 - Collagen %
 - % protein on dry matter
 - Stunned slaughter (compulsory!)
 - **Meat stock**
 - Amount of creatinine (mg/L) in the product
 - % of creatinine in the meat extract on dry matter without salt
 - % of dry matter in the meat extract
 - % of salt in the meat extract
 - **Wild fish and meat**
 - Fishing/hunting season

- **Cheese**
 - Firmness of the cheese: EXTRA HARD / FIRM/SEMI-HARD / HARD / SOFT / UNCLASSIFIED / UNIDENTIFIED
 - Type of cheese: CAMEMBERT / EMMENTHAL / GORGONZOLA / GOUDA / ETC.
 - Form: BLOCK / CHUNKS / CRUMBLES / ETC.
- **Cream**
 - Type of cream: CLOTTED CREAM / CONDENSED CREAM / CRÈME FRAICHE / HALF AND HALF / ETC.
 - Fat content of the cream: FULL FAT / LOW FAT / NON FAT / REDUCED FAT / SOFT / UNCLASSIFIED / UNIDENTIFIED
- **Yoghurt**
 - Fat content of the cream: FULL FAT / LOW FAT / NON FAT / REDUCED FAT / SOFT / UNCLASSIFIED / UNIDENTIFIED
 - Origin: BUFFALO / CAMEL / COMBINATION / COW / DONKEY / ETC. UNCLASSIFIED / UNIDENTIFIED
 - Added ingredients: CEREALS / COMBINATION / FRUIT PIECES / FRUIT PULP / HONEY / JUICE / ETC. / UNCLASSIFIED / UNIDENTIFIED
- **Fruit - apples**
 - Variety of apple: ADAM'S PEARMAN / ADMIRAL / AFRICAN RED / ETC. / BELGICA / ETC. / JONAGOLD AND MUTANTS / ETC. / UNCLASSIFIED / UNIDENTIFIED
 - Country/zone of origin: CHINA / CHRISTMAS ISLAND / COLOMBIA / ETC. / UNCLASSIFIED / UNIDENTIFIED
- **Oil**
 - Erucic acid
 - Extra virgin olive oil: acidity level, FAEs, Wax (C42+C44+C46), 2-Glyceryl monopalmitate, Stigmastadiene, K232, K270
- **Cosmetics**
 - Liquid products: viscosity and foaming power (soap, shampoo)
 - Non-liquid products: number of pieces, dimensions, shape, specific gravity, tolerances on weight, etc.
 - Wet wipes: (cosmetics or detergents)
 - Dimensions: length, width, thickness (mm) + tolerance
 - Weight dry & wet (g) + tolerance
 - Specific gravity (g/m²) + tolerance
 - Strength wet MD & CD + tolerance
 - Composition (e.g. cellulose, viscose, Spunlace, etc.)
 - Toothpaste:
 - Total and available fluoride
 - Value for Relative Dentin Abrasivity (RDA)
 - Value for Pellicle Cleaning Ratio (PCR)
 - Product lost (residue left after using up the toothpaste)
- If you cannot find the correct code in the available list of codes for the fields:
 - Physiochemical Characteristic Code
 - Microbiological Organism Code

- Microbiological information to be provided in CFU/10 g or CFU/25 g (e.g. for salmonella & listeria) instead of per 1 gram
- Preservation Technique Code

Complete this field in Dutch, French or English.

3.25.7 Other ‘Colruyt Private Label’ fields - 3 (not in tables)

INDICATOR EDIBILITY CHEESE RIND 

For cheese products, indicate whether or not the rind is edible:

- [TRUE] = The rind of the cheese is edible
- [FALSE] = The rind of the cheese is not edible

CHEESE RIPENING TIME - UNIT OF MEASURE 

For cheese products, indicate the period during which the cheese matures (as the number of days, months, etc.).

SEASON PARAMETER CODE 

If applicable, select the correct specific period when the product is available (e.g. for game, wild fishery products, etc.).

Note: If you cannot find the correct code, select ‘Other’ and enter the correct season in the field below.

3.25.8 Season

LANGUAGE – SEASON NAME 

Click ‘Add new’ to access the following screen.

Season Name

Language * Season Name * ⓘ

- Select an option - ▼

Enter a value 🗑️

[+ Add new](#)

If applicable, specify the season in which the product is available in Dutch, French and/or English.

3.25.9 Tasting Notes and other organoleptic characteristics

LANGUAGE - TASTING NOTES AND OTHER ORGANOLEPTIC CHARACTERISTICS

Click 'Add new' to access the following screen.

Provide information on the organoleptic parameters of the product. These are properties of a product that are perceived through the senses, such as taste, aroma, colour, texture and appearance, their evolution during its shelf life.

Also use this field to specify the cutting method **for meat products**.

Complete this field in Dutch, French or English.

If multiple types of information are included in this field, you should separate them by using 'spatie#spatie'.

Example: Aroma: earthy # taste: bitter # colour: transparent

3.25.10 Other 'Colruyt Private Label fields - 4 (not in tables)

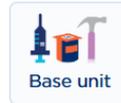

IS THE HAZARDOUS SUBSTANCE A MIXTURE?

Select the correct value:

- [TRUE] = Hazardous substance is a mixture
- [FALSE] = Hazardous substance is not a mixture
- [NOT_APPLICABLE] = Product is or contains no hazardous substance

POST CONSUMER RECYCLED CONTENT PERCENTAGE

For all listed packaging materials specify the percentage of recycled consumer waste. This is the percentage of material recovered after being used by the end user and then discarded. This includes products collected through recycling programmes. Please complete the applicable percentage

3.26 Section ‘Others’

3.26.1 Additional Product Classification

Click ‘Add new’ to access the following screen.

ADDITIONAL PRODUCT CLASSIFICATION TYPE CODE

Select code 76 ‘EU Regulation (MDR/IVDR) Risk Class’ if the product is a medical device.

ADDITIONAL PRODUCT CLASSIFICATION CODE VALUE – ADDITIONAL PRODUCT CLASSIFICATION VERSION

Click ‘Add new’ to access the following screen.

Additional Product Classification Value

Additional Product Classification Code Value ⓘ <input type="text" value="Enter a value"/>	Additional Product Classification Version ⓘ <input type="text" value="Enter a value"/>
--	---

[+ Add new](#)

Enter the correct class of medical device.
